

### Introduction

Pardis Innovation District was established in 2005 with a focus on Pardis Technology Park (PTP), under the auspices of the Vice-Presidency for Science and Technology, with a multi-sectoral approach located 20 km east of Tehran.

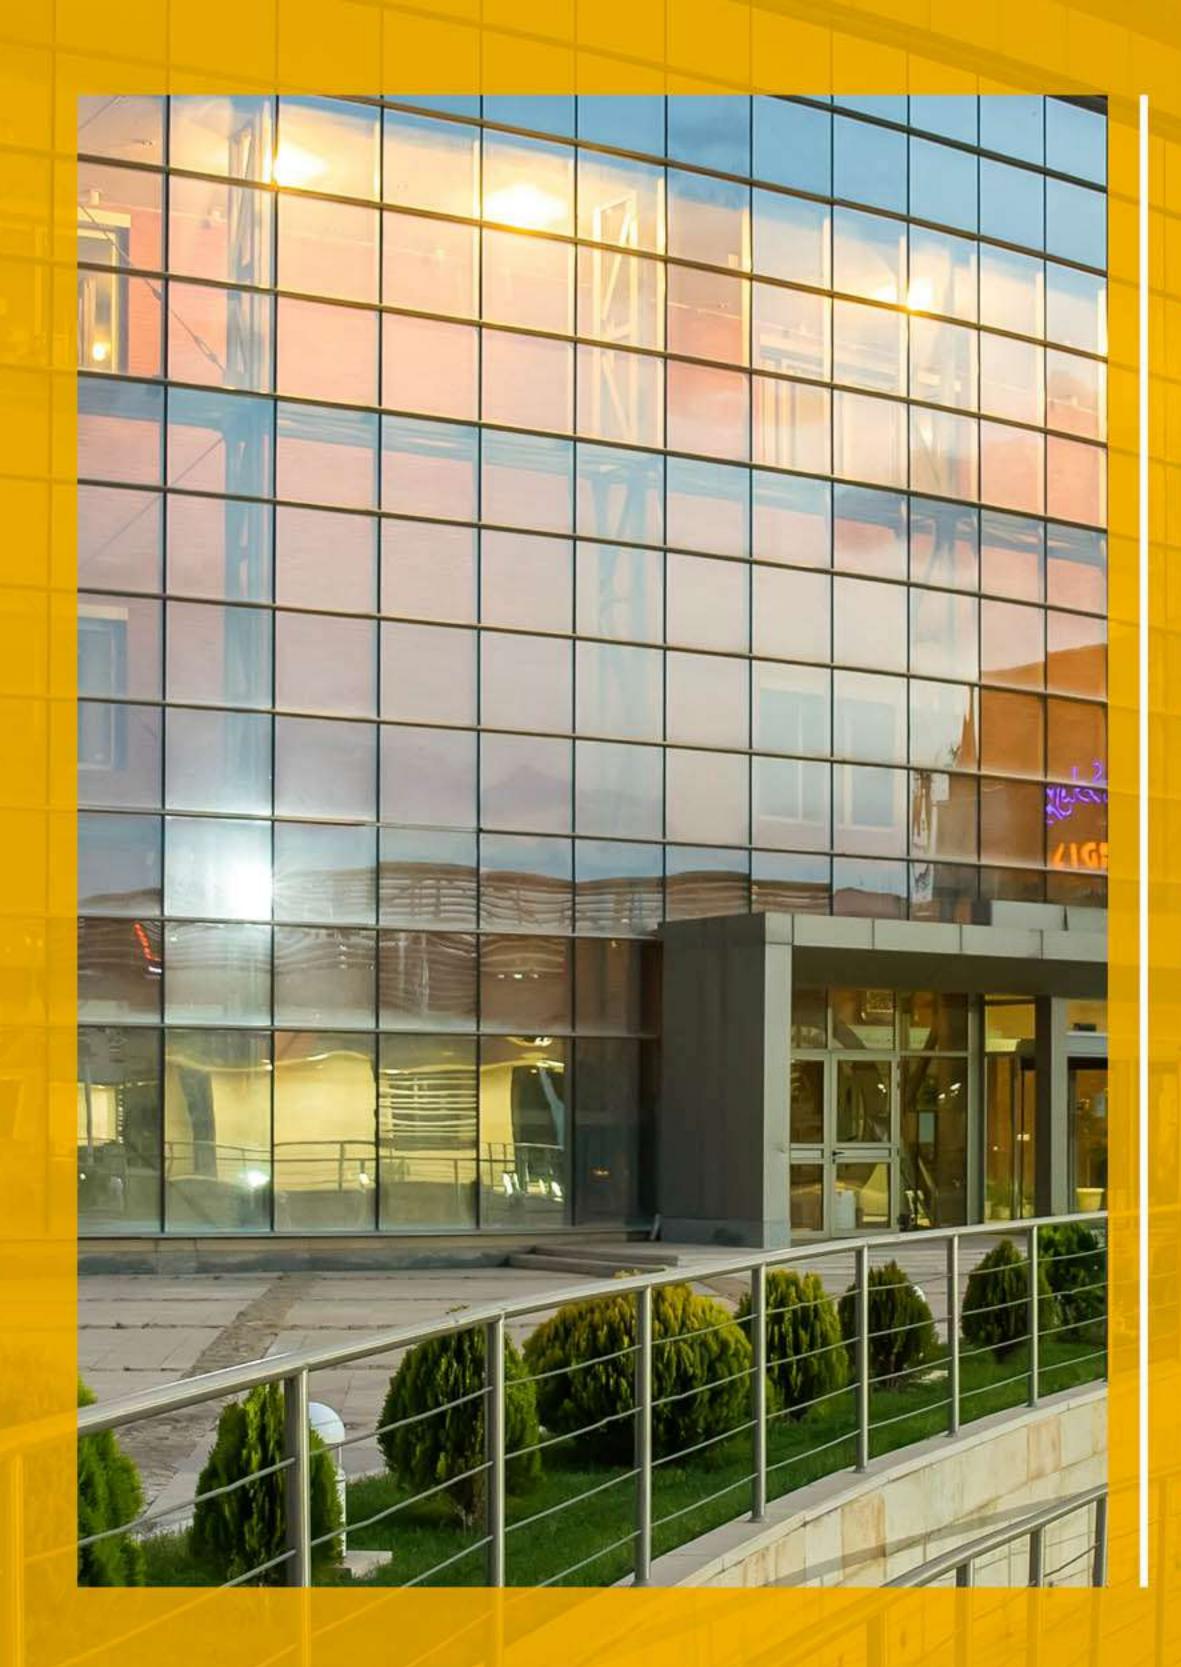

According to the PTP development plan, there are four main existing phases measuring 58 hectares (expandable to 1000 hectares): Innovation Pardis, Knowledge Pardis, Entrepreneurship Pardis, and Phase 4 of the Park. So far, more than 250 technology and knowledge-based companies in advanced technologies such as Information and Communication Technology (ICT), Biotechnology, Nanotechnology, New Materials, Mechanical Engineering & Automation are members of PTP. Pardis Innovation District has played an influential role in developing science and technology in Pardis city and Tehran province and focused on commercializing the achievements of technologists and creating a suitable platform for technology growth and market development of knowledge-based companies.

# Advantages and services in Pardis Technology Park

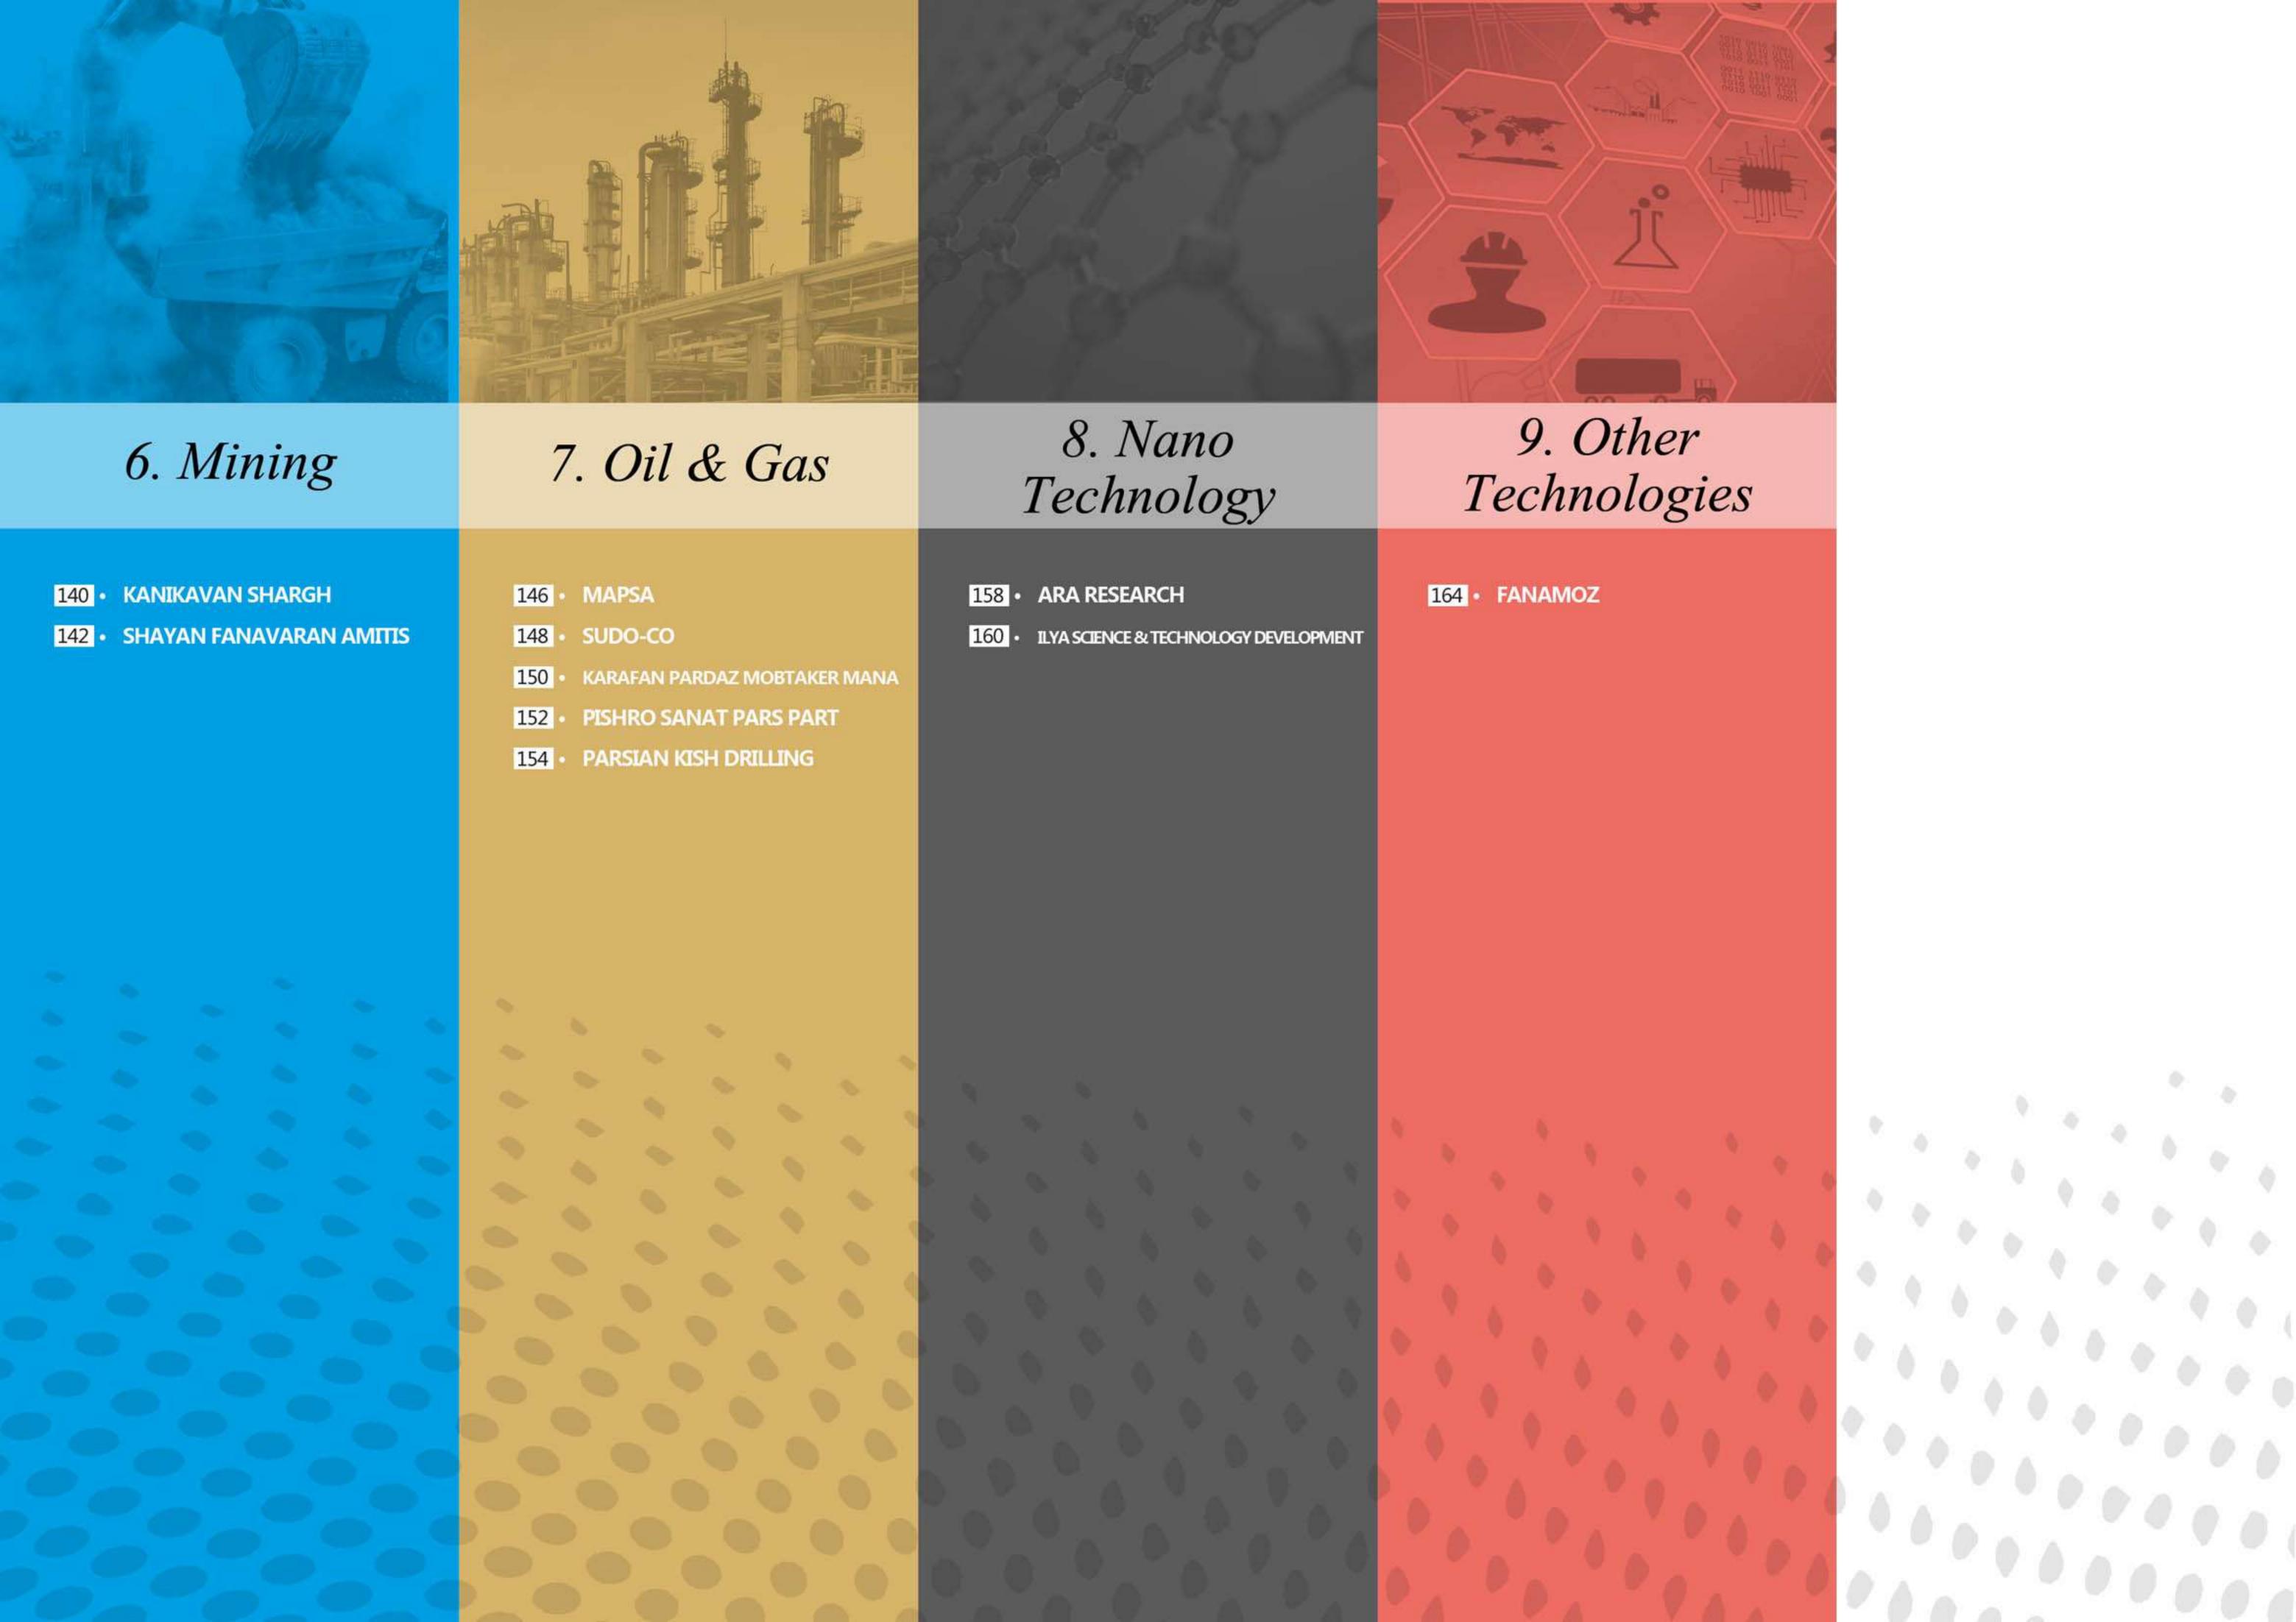

One of the objectives of PTP, in line with its mission, is to create the necessary infrastructure to achieve goals, such as becoming the region's first country in science and providing comprehensive facilities for attracting and employing elites and specialists. Therefore, PTP offers many benefits to its members, such as the Commercialization of their technological achievements and a suitable platform for technology growth and market development.

Moreover, as a center for the development of advanced

Moreover, as a center for the development of advanced technology, PTP offers various services, including:

- Public and municipal
- National and regional
- Marketing and technology
- Monitoring and evaluation
- Selection and acceptance

#### **About Company:**

IMENIJAZ Company was established in 1994 With 22 years of experience in technical medicine. IMENIJAZ has become one of the leading Asian medical manufacturers. Products such as Implants systems, Surgical instruments, Power tools, Innovative Endoscopy products, and Electro-stimulators are among our manufactures.

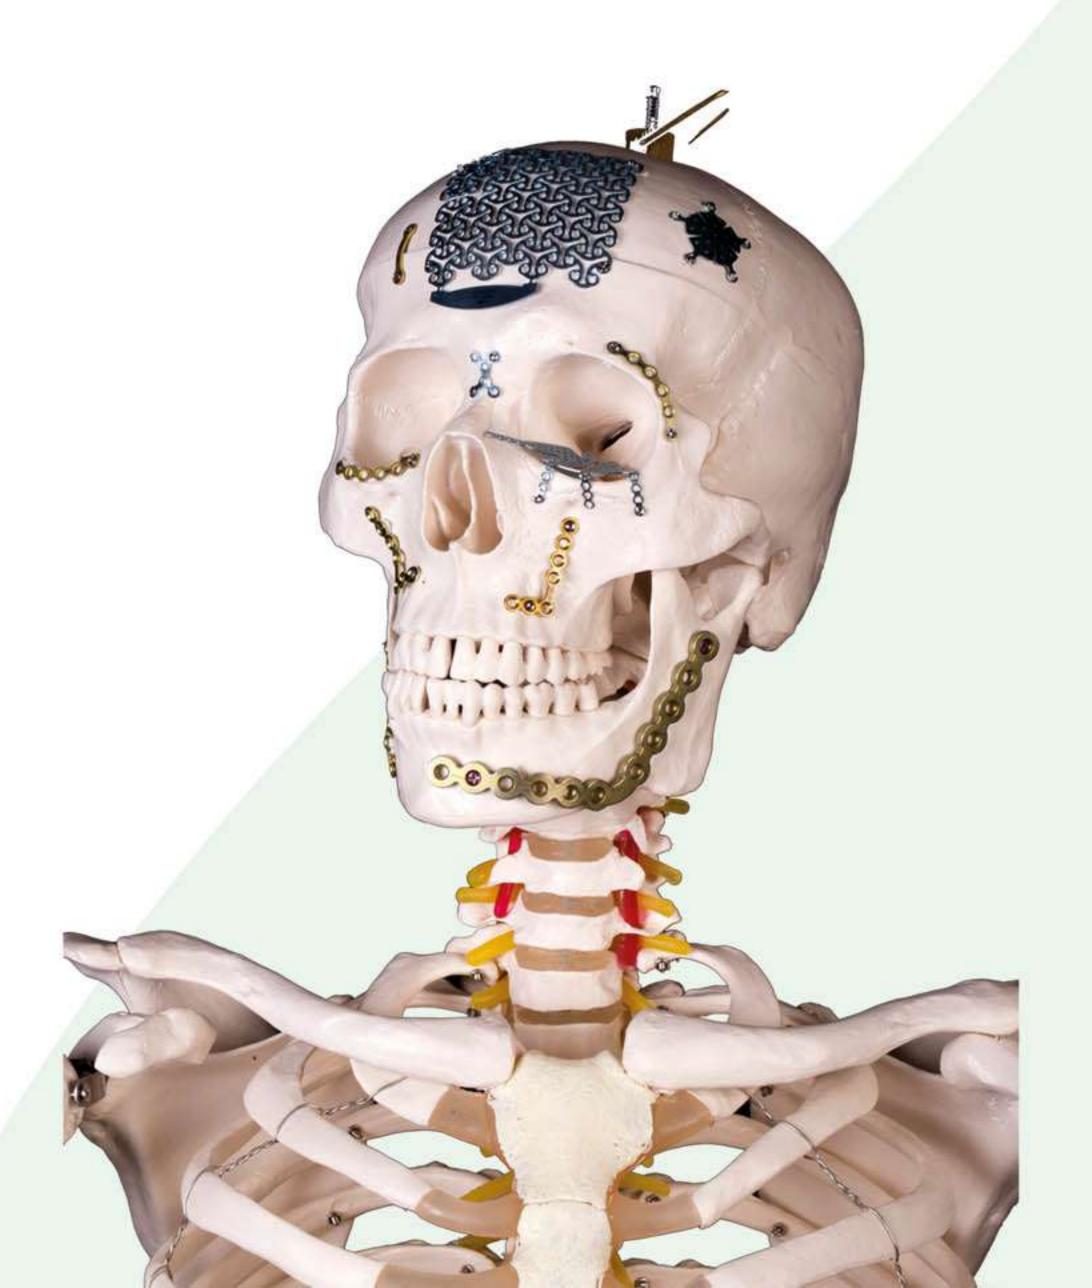

#### Company's products and services:

- Surgical Instruments applied in: Gynecology, Liposuction, Microsurgery, Neurosurgery, Oral and Maxillo Facial Surgery, and Rhinoplasty.
- Implants applied in: Orthopedic, PectusExcavatum, CranioMaxillo Facial, and Spinal Systems

#### **Application of Products and Services:**

Implants system, Spinal System, surgical, thoracolumbar

#### **About Company:**

This company has provided effective services in the health industry using the modern knowledge of 3D printing, such as rapid prototyping and rapid tooling. The technologies that have been used for this matter include the following:

Competitive Advantages:

Competitive prices

- (SLS) Selective Laser Sintering
- (SLA) Stereolithography
- (MJM) Thermojet
- (FDM) Fused deposition Modeling

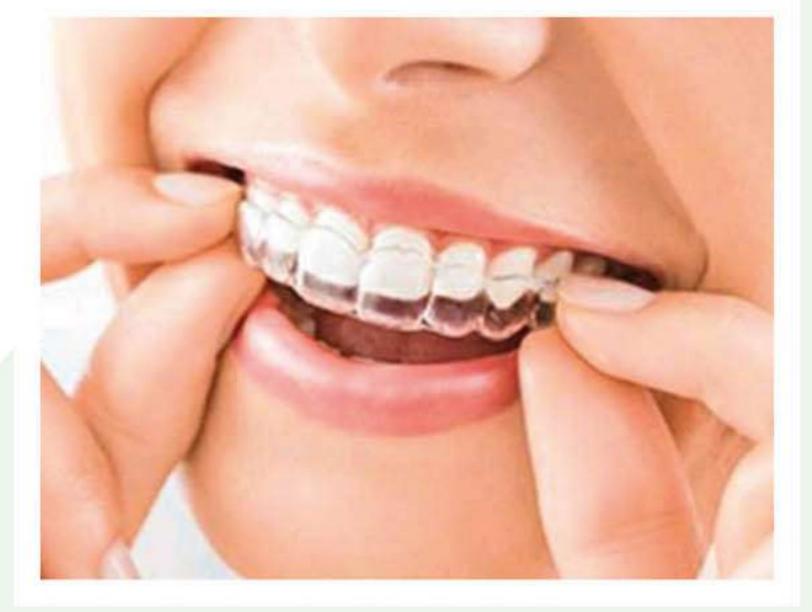

- Digital Medicine Personalized
- Patient Specific Implants(PSI)
- Surgical Guides in different fields
- Convert CT-SCAN and MRI images to 3D models by 3D Printer
- Design and manufacture of Implant and Surgi Guide types by 3D Printer specifically for each patient
  - Design and manufacture of Cutting Guide, Wafer and Splint (Intermediate, Final) by 3D Printer specifically for each patient
- Ability to obtain a variety of files for engineering analysis software in order to separate hard tissues and soft tissues
- Provide consulting services in specialized fields of computer application and 3D printers in surgery and dentistry.

#### **Application of Products and Services:**

Health, Architecture, Industrial, art

#### **About Company:**

Morvabon Company was established in 2007 to produce dental materials. This technology base company has produced 17 products using the best raw materials, pharmaceuticals, and pure grades.

- · Morva Prep (EDTA Cream) Root canal cleaning
- Morva-Sept solution and gel (Chlorhexidine 2%) Effective Disinfectant
- Cavi-Mor material for temporary fillings
- Mor.T.Aroot canal repair cement
- Flouride Varnish Protects tooth decay and strengthens roots
- Morva-Bond To Bonding repair teeth
- Mor-Silane Create adhesion and connection
- Morva-flow Composite for tooth restoration and filling
- Morva-barrier Protective to prevent the material from coming into contact with the gums

#### Application of Products and Services:

Dental material

#### **Exported Markets:**

Iraq, Afghanistan, Armenia

#### Certificates:

- · ISO13485
- · ISO14001
- ISO9001
- · ISO10002
- · OHSAS18001

#### **Products and Services:**

- Alum-Stop Gel (Aluminum Chloride 25%) Dental hemostatic viscose gel
- Calcium Hydroxide powder for root canal treatment
- Cera Etch gel (Hydrofluoric Acid gel) for porcelain and ceramic restorations inside of the mouth
- 17% EDTA Solution and gel for irrigation during endodontic therapy
- Hypo-Endox 5.25% solution sodium hypochlorite5.25% Effective Disinfectant
- Endo-cal paste (Calcium Hydroxide paste) Suitable for filling infected dental
- Eugenol Pure-USP grade Antiseptic, Analgesic and Sedative essential
- Morva-Bleach (in office and home Bleaching gel No lights is needed) • Tooth whitening kit
- Morva-Etch gel (Phosphoric Acid gel) Total Etching gel
   Suitable blue pigment

Having a qualified team of scientific/technical staff. This team has up-to-date knowledge of the most recent technological developments in the world.

Observing Iranian/European standards in quality assurance requirements such as ISO 13485 and

CE Mark All products are designed and manufactured to meet the highest standards related to electrosurgical units: IEC60601-1, IEC60601-1-2, IEC60601-2-2.

#### **About Company:**

Kavandish System successfully designed and manufactured the first Iranian-made Electrosurgical Unit. This ESU met the rigorous requirements of international standards and has been approved by the most renowned Iranian surgeons and clinics. Today, company growth to over 70 employees is a testimony to the validity of Kavandish System's original ambitious goals. Kavandish was established in 1995, Kavandish System initiated its activities to design and manufacture medical devices.

#### Certificates:

ISO 13485, CE Mark

#### **Export Market:**

Indonesia, Turkey, Iraq, India, Belarus, Syria, Lebanon,....

#### **Products and Services:**

- MEG1: General Electrosurgical Unit (ESU) with high-performance levels and patient safety to meet all the demands of general surgery.
- **MEG1-E**: MEG1-E is the specialized electrosurgical unit for endoscopic procedures. Advanced endoscopic cutting modes for Polypectomy, Sphincterectomy at ERCP.
- MEG1-R: MHZ Technology for Dermatology, Plastic, Aesthetic, ENT, GYN, Ophthalmology, and Dentistry.
- MEG2: MEG2 is an electrosurgical generator modified and specialized for VESSEL SEALING applications. Also, conventional Bipolar coagulation with Auto-start/Auto-stop functions is provided to satisfy more needs in general surgeries.
- ICONIC-IS410: ESU+Vessel Sealing System(Optional) +Argon Plasma Cut & Coagulation
- ICONIC IMAGE1: Our latest ESU, built on Iconic family platform, provides the most user-friendly interface to integrate reliability, safety, and convenience. Image1 is an all-in-one electrosurgical generator, suitable for all operative procedures, including Vessel Sealing, Argon Plasma Coagulation, TUR, etc.

#### ARGON PLASMA SUPPLIER (APS1):

APS1 is an Argon Gas Supplier device intended to be used in conjunction with Iconic electrosurgical generator to obtain argon plasma coagulation and argon-enhance cutting. APS1 is responsible for controlling and directing argon gas toward the surgical electrode. The device can be used in open and endoscopy/laparoscopy surgeries.

# PREMIER ELECTROMEDICAL CARE

#### Competitive Advantages:

High quality products are based on research and development with considerable customer services

#### **About Company:**

PEC was founded in 2001 to manufacture the full range of medical equipment, especially for operation rooms and other wards.PEC manufactures and distributes products and systems for Anesthesia Machine, Ventilator, Syringe Pump, and Patient Care Monitoring Systems. Quality Systems and products are certified to CE and ISO standards. Supplying reliable products of the highest quality, PEC constantly reviews its product design, manufacturing processes and systems, and training procedures to ensure its customers deliver optimum patient care. In-house design and manufacture give PEC total quality, precision, and cost control. This provides a significant advantage over companies that sub-contract their manufacturing and assembly functions to third-party providers. Manufacturing systems at PEC are certified to ISO 13485:2016. Our systems and facilities are regularly inspected and audited by regulatory bodies. We consistently meet and exceed all the required levels of competence required by each agency. From raw metal to finished assembly, only PEC can ensure quality throughout the process.

#### **Products and Services:**

#### Anesthesia Machine

OXYN2: The intended for use for OXYN2 anesthesia machines is for the application of continuous flow anesthesia in an induction or operating room VentOxyn: The machines are intended for use in the application. The mechanical AHD system is designed to minimize the risk of a hypoxic mixture reaching the patient.

#### Monitoring System

PEC12T08: Portable patient monitor system 12" with TFT color display and adult neonatal applications

PEC15T08: Portable patient monitor system 15" with TFT color display and adult neonatal applications

PEC19T08: Portable patient monitor system 19" with TFT color display and adult neonatal applications

PEC19T16: Portable patient monitor system 19" with TFT color display and adult neonatal applications. (Central Monitoring System)

- Syringe Pump: SP900: 5 inches High-Resolution LCD & Capacitive Touch Screen Monitor
- Ventoxyn+: Advanced anaesthesia machine system, Simple and easy to use 10" touchscreen ventilator display with rotary knob, Fully integrated with Masimo Gas-Analyzer and Capnography, Pressure, Flow, Volume vs. Time waveforms plus two spirometry loops,

Dynamic Lung visualization with measuring compliance and resistance,
Adaptive Chest-Flow feature in ventilator reduces the risk of baro/volu-trauma,
Heated absorber and breathing circuit, Measuring flow with dual accurate
permanent flow sensors with moisture protection, Auto-Record Keeper up to
10000 events, and Intelligent lighting that highlights active flow controls

#### Application of Products and Services:

Medical equipment, especially for operation rooms

#### **About Company:**

Pooyandegan Rah Saadat Co was found in 1998 by getting support from a research institute, Jooyandegan Rah Saadat. Saadat main field of activity is designing and manufacturing patient & Wearable monitors (display size: 3.5 to 18.5 inches), central system, ICU ventilator, electrocardiograph, BFA (brain function assessment) module, Suction, AED Defibrillator, Infrared Thermometer. Saadat is committed to provide safe and effective patient care solutions

Competitive Advantages:

health centers by smartphones

#### ICU Ventilator **RESPINA P1**

- High performance flow sensor
- Permanent oxygen sensor
- Input oxygen concentration

measurement with compensation

- Gas supply: 1.2 to 6.0 bar
- Volume and pressure controlled ventilation
- Dual Control in the breath
- Smart alarm system
- 72 hours trend storage
- Pediatric through adult (20-2600 ml Tidal volume)

- Character Char

- Automatic leak and compliance compensation

#### Electrocardiograph Dena 1210

- Capacitive touch screen
- Simultaneous displaying and recording of 12 leads ECG
- Waveforms
- Measurement and interpretation (Glasgow program)
- Data storage of 500 records and capability to review and print them (Save)
- Rechargeable Lithium Battery Filter types: EMG, Drift, HUM (50 Hz), Low pass

#### ICU Ventilator **RESPINA P2**

- Wide 18.5 inch TFT
- Easy accessible inhalation and PEEP valve ports
- High performance flow sensor, reusable after disinfection
- Permanent oxygen sensor
- Input oxygen concentration measurement with compensation
- Gas supply: 1.2 to 6.0 bar
- High flow Oxygen Therapy (HFO)
- Respiratory flow up to 250 L/min

#### Patient Care Monitor

Modules: ECG/SPO2(Masimo)/NIBP/RESP/2TEMP/2IBP/EtCO2 Hemodynamic & Drug Calculation | OXY-CRG | Pump Page | Quick Startup | Alarm Recall | Multi Page | Trend | Detection and rejection of Pacemaker signals | Arrhythmia detection | PVC per minute | ST segment analysis for 12 Lead ECG signals | Event Log | Fanless and...

Options: Touch Screen | Thermal Printer | 12 Lead ECG | 4IBP | Multigas Analyser | ICP | Cardiac Output | Bed to Bed | Dual SpO2 Masimo Rainbow (PVI/SpHb/...) | PPV | Nurse Call | ECG Output Brain Function Assessment |

#### JAM H1

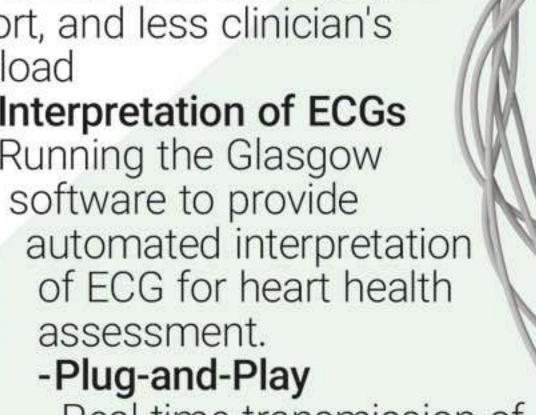

- Driving 12 leads ECG using 6 wires

Fever ECG electrodes and lead wires cause more patient comfort, and less clinician's workload

 Interpretation of ECGs Running the Glasgow software to provide of ECG for heart health assessment.

- Weighing only 120 g - Small dimensions (102x64x26 mm) - Portable ECG device that you can travel with anywhere you like

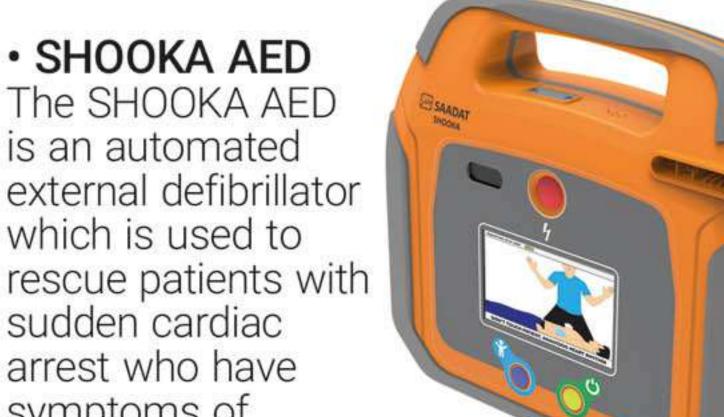

- IP22

SAADAT

23

external defibrillator which is used to rescue patients with sudden cardiac arrest who have symptoms of unconsciousness, absence of breathing and absence of pulse. SHOOKA automatically analyzes the patient's ECG signal, identifies sudden cardiac arrests (SCA) and if necessary delivers electrical shock to the patient.

Ravan Sazeh Knowledge-Based Company (Limited Liability) was established in 1991 in Tehran with the aim of operating in various civil engineering sectors. Among the construction projects carried out by this company are the specialized Erfan Tehran Hospital, Mehr Medical Center in Rasht, Negah Tehran Eye Clinic, Mehr Research Center in Rasht, Erfan Tehran Physicians Building, and recently the modern and advanced Niyayesh Tehran Hospital and the specialized fertility treatment clinic Navid. In 2016, after changing the company's field of activity and through the relentless efforts of researchers in the field of medical engineering and clinical embryology, the first specialized CO2 incubator for embryo culture was produced for use in the field of infertility treatment and embryology. After the approval of this product in clinical centers, Ravan Sazeh Company obtained the title of a knowledge-based company in 2017. Today, Ravan Sazeh Co. has succeeded in offering more than 30 products for embryo culture use and other consumables in the field of embryology. After passing various stages of testing and quality control, these products have reached the commercialization phase and are ready to be introduced to the market.

Competitive Advantages:

foreign products

34

#### **Application of Products and Services:**

Medical and laboratorial equipment

#### **Products and Services:**

 Ravan Sazeh Company has produced and commercialized a complete set of products required in the field of embryology for infertility treatment centers. Ravan Sazeh Company has manufactured a complete set of culture media, materials, and supplies for egg collection, sperm washing, laboratory fertilization, embryo culture, Egg and embryo freezing Media, embryo transfer media, embryo biopsy, male fertility assessment kits, and kits for enhancing the fertility potential of couples. These products include single-step embryo culture media, day 1 to 3 embryo culture media, day 3 to 5 embryo culture media, sperm gradient media, sperm washing media, sperm freezing media, HTF culture media, HTF culture media with HEPES, embryo transfer media, non-specific straws for egg and embryo freezing, polyvinylpyrrolidone, 10% human serum albumin, Hams F10 culture media, hyaluronidase enzyme, embryo culture mineral oil, egg and embryo freezing media, egg and embryo thawing media, intracytoplasmic sperm injection (ICSI) pipette, ICSI holding pipette, blastomere biopsy pipette, needle for follicle puncture, sperm DNA Defragmentation assessment kit, chromatin maturity assessment kit for sperm, and platelet-rich plasma separation and CO2 incubator.

- **DIBALOY** dental amalgam capsules and powders, this restorative material has very low static creep factor and high early strength, so strong margins can be established without breakage and the risk of bulk fractures is reduced during the first few hours of restoration.
- **DIBAFIL M90** is a universal light cured micro hybrid composite. Hybrid technology allows this restorative to be ideally suited for making inlays, onlays and veneers and convenient restorations in the anterior and posterior tooth areas. Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C2, C3, C4, C5, D1, D2, D3, D4, BW, XBW, ONE
- **DIBAFIL N50** is a light cured nano hybrid composite with great physical properties and suitable for both direct and indirect restoration of all cavity classes like inlays and onlays. Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C2, C3, C4, C5, D1, D2, D3, D4, BW, XBW, ONE
- **DIBAFIL FLOW** is a light cured flowable composite suitable for direct restoration and sealing fissures. This restoration is appropriate for cavities such as I, II, III and V for tooth areas without chewing function.

  Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C2, C3, C4, C5, D1, D2, D3, D4, BW, XBW, ONE
- **SOLAFIL M90** is a universal restorative material. Hybrid technology allows this restorative to be ideally suited for making inlays, onlays and veneers and convenient restorations in the anterior and posterior tooth areas. Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C1, C2, C3, C4, D3, BW, XBW, ONE
- **SOLAFIL ONE** is a universal light cured micro hybrid composite, combined of macro & micro fillers with excellent physical property. Hybrid technology allows this restoration to be ideally suited for making inlays, onlays and veneers and convenient restoration in the anterior and posterior tooth areas.

SOLAFIL N50 is suitable for both direct and indirect restoration of all cavity classes like inlays and onlays.
Shades: A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C2, C3, C4, C5, D1, D2, D3, D4, BW, XBW, ONE

• **SOLAFIL FLOW** is a light-cure flowable composite suitable for direct restoration and sealing fissures. Shades:

A1, A2, A3, A3.5, B1, B2, B3

- **SOLAFIL B40** is a Light-curing, radiopaque posterior composite which is highly viscous and flowable for easy and fast handling in bulk-fill technique up to 4 mm layers.
- SOLABAND is light cured adhesive one step bonding. This bonding uses for enamel and dentine.it is suitable for composite inlays, ceramic, crowns as onlays, veneers bridges.
- **SOLAETCH** is 37.5% phosphoric acid universal etchant gel use in dentine and enamel, designed for maximum etching efficiency.

### Application of Products and Services:

Production of dental restorative materials

#### Certificates:

ISO 13485-2016

#### **Exported Markets:**

Trent dent, based in London, manufactures and distributes dental restorative materials in over 35 countries across the world.

### Competitive Advantages:

- Boosting customer satisfaction
- Access to foreign markets
- Improving the scientific level of employees
- Developing the company's activity

#### **About Company:**

ARKAN ARA TEJARAT ALBORZ Company was established in 2007 in the Tehran in order to produce and to supply of medical and hospital equipment required by the country's industrial industry.

The company, by gaining the necessary experience and skills as well as estimating the needs of the country's in the health field, produced medical and hospital equipment including 12-channel electrocardiograph and is trying to increase its product portfolio in the field of domestic products.

#### **Application of Products and Services:**

Production and design medical and hospital equipment

#### Certificates:

• **Permissions** - ISO9001:2008

- ISO13485:2003

Standards - FDA

- IQNET

- CE

#### **Products and Services:**

• 12-channel electrocardiograph (ECG / ECG)

Equipped with 5-inch monitor

Ability to work with electricity and rechargeable batteries with long life

Interpretability

The only electrocardiograph produced in Iran with the ability to detect Pace Maker.

#### Company's import products:

- DC Shock Paper
- Electrocardiograph (ECG) paper
- Ultrasound and echocardiography device paper
- ZONARE US Ultrasound Model ZS3
- Syringe Pump modelPion (Bionet)
- 12-channel electrocardiograph (ECG / ECG) Bionet Cardio7

Website: regen.ir

The Iranian Tissue Product Company emerged in 2012 with the esteemed scientific and executive support of faculty members and specialists from Tehran University of Medical Sciences. Our journey has been one of remarkable success in the production and presentation of allograft products within Iran. A Commitment to International Standards: Recognizing the tremendous potential in our achievements, we embarked on a path to expand our impact even further. By embracing modern sciences and incorporating international standards, we elevated our production capabilities to match global benchmarks in allograft products. Licensed for Excellence: We take great pride in having obtained the necessary licenses for exploitation and production activities. The National Medical Device Directorate of the Iranian Food and Drug Administration, along with the Ministry of Industry, Mine, and Trade, have granted us the approvals we need to operate confidently and securely. Furthermore, our ISO 13485:2016 standard accreditation from the reputable KGS validation company further affirms our commitment to quality and excellence. The Gold Standard in Tissue Reconstruction: Regen Allograft products stand as the treatment of choice and the gold standard for human body tissue lesion reconstructions, be it soft tissue or bone. Our products serve as invaluable scaffolds, volumizing agents, and biologic dressings across various medical fields. They find applications in orthopedic and spinal repair

surgery, cardiovascular surgery, burn repair, ENT and rhinoplasty, maxillofacial surgery and dentistry, and more. Quality, Effectiveness, and Safety - Our Promise: The paramount importance of quality, effectiveness, and safety underpins our every endeavor. By adhering to the rigorous standards and protocols set forth by the American Association of Tissue Banks (AATB), we ensure that our products meet the highest levels of excellence. Additionally, continuous regulations by competent bodies and our diligent quality control and assurance unit further guarantee the integrity of our allograft products. We take utmost care in selecting healthy tissues from generous Iranian donors, safeguarding the well-being of recipients. Global Aspirations: We are not content with just excelling in our local domain. At Regen Allograft, we have set our sights on broader horizons. We actively seek foreign partners for co-operation and collaboration, as well as technology transfer agreements. Through these partnerships, we aim to extend the reach of our high-quality products to patients across the world, making a positive impact on healthcare on a global scale.

At Regen Allograft, we are thrilled to present our product family, encompassing a diverse range of innovative solutions for tissue reconstruction and regeneration. With a focus on quality, effectiveness, and safety, our products are designed to cater to various medical needs, delivering optimal outcomes for patients worldwide. Explore our exceptional offerings below:

- Lyophilized Acellular Dermis Membrane: A state-of-the-art acellular dermis membrane, lyophilized for ease of use. This product acts as a reliable scaffold for tissue reconstruction and wound healing, making it an indispensable tool in surgical procedures.
- Lyophilized Particulated Bone Grafts: Our lyophilized particulated bone grafts come in various forms, including powder, crushed, chips, matchsticks, cubes, and wedges. These bone grafts provide critical support for bone repair and regeneration, ensuring a successful and efficient healing process.
- Lyophilized Pericardium Membrane: A
   cutting-edge pericardium membrane, lyophilized
   to preserve its natural properties. This product
   serves as an invaluable aid in maxillofacial and
   reconstruction surgeries, contributing to
   improved patient outcomes.
- Cryopreserved Tendon: Our cryopreserved tendons, including Achilles tendon, Anterior tendon, Posterior tendon, and more, offer unparalleled support for tendon repair and reconstruction. These tendons are meticulously preserved to maintain their native integrity.

- Cryopreserved Heart Valve: Embrace our Cryopreserved Heart Valve solutions, available for Aortic and Pulmonary Valve repair. These meticulously preserved heart valves offer exceptional outcomes in cardiovascular and reconstruction surgeries.
- Lyophilized Fascia Lata Membrane: A
  lyophilized fascia lata membrane, renowned for
  its versatility in orthopedic and maxillofacial
  surgeries. This product plays a pivotal role in
  enhancing tissue repair and regeneration.
- Frozen Bone: Our frozen bone allografts are carefully preserved to retain their structural properties. These grafts provide essential support for various clinical indications, making them a go-to choice in surgical settings.
- Collagen Gel Filler: A revolutionary collagen gel filler, designed to enhance soft tissue augmentation and restoration. This product delivers natural-looking results, empowering patients to feel their best.
- In Alcohol Cartilage and Septum: Our cartilage products, preserved in alcohol, present an effective solution for cartilage repair and reconstruction. Ideal for joint and tissue restoration procedures.
- Glycerolized Partial Thickness Skin
  Membrane: A glycerolized partial thickness skin
  membrane, perfectly suited for skin grafting and
  wound healing. This product facilitates faster
  and more efficient tissue regeneration.
  Join us at Regen Allograft and experience the
  pinnacle of tissue reconstruction solutions. Our
  top hit product family is a testament to our
  unwavering commitment to excellence and
  advancement in the field of allograft
  products.

#### About SaliraVira®Natural Medicine

The research and development of SaliraVira® was based on "systems biology" approach. For the research and development of SaliraVira®, a dataset consisting of 737 articles and scientific reports and 768 corona antiviral compounds and 48 natural ingredients was collected and processed. SaliraVira® contains a combination of medicinal plants with very effective properties to improve symptoms, reduce viral load, reduce the duration of treatment and prevent hospitalization and prevent death of Covid-19patients. Among the plants in SaliraVira® are rosemary, rhubarb, hyssop, echinacea, licorice and ginseng.

#### SaliraVira Tablets:

For manufacturing SaliraViraTablest, CCG technology is used. The amount of active ingredient in each tablet is 500 mg. Drug usage instruction: The treatment period is 8 to 10 days. Take one tablet every 4 hours and 4 tablets a day.

#### Oral Spray:

Drug usage instruction: The treatment period is 15 days. Take 2 puffs every 4 hours. Each puff is about 50 microliters.

#### AiraVira Nasal Spray:

Drug usage instruction: The treatment period is 15 days. Take one puff every 4 hours in each nostril.

67
Each puff is about 50 microliters.

## SINACELL

#### **Competitive Advantages:**

SinaCell is the first company who achieved Ministry of Health GMP (Good Manufacturing Product) confirmation to produce stem cell, cartilage, amniotic membrane, fat cells and Platelet-rich plasma.

#### **About Company:**

Sinacell was founded in 2007 (Tehran, Iran) as a Manufacturing Research Company in Stem Cell and Tissue Engineering to become a key player in the production of advanced products for therapeutic applications

#### Cell-Amniosin<sup>™</sup>:

Has been demonstrated in clinical trials to improve the healing of different wounds in different size such as Dressing and cover the burn wounds, Diabetic ulcers, Chronic wounds, Urology surgeries, ENT (Ears, Nose, Throat) surgeries

#### Amniosin™

Has been demonstrated in clinics for Corneal and conjunctival diseases **DehydratedAmniosin (D-Amniosin™)** 

Is intended to protect the underlying tissue and preserve tissue plane boundaries with minimized adhesion or fibrotic scarring. Indications

#### AmnioDisk™

AmnioDisk is 3th generation amniotic membrane technology - a sutureless, overlay AM disk for the office-based or surgical treatment of the ocular surface

#### Sinaplex<sup>™</sup>

Can be used in medical applications (wounds healing, Repair of damaged tissues such as liver, etc.) and cosmetics (as skin and hair rejuvenation)

#### Sinaderm<sup>™</sup>

Sinaderm is a "skin substitute" that is placed on wounds to cover it and to help it heal. It is manufactured in an aseptic environment. It also contains a temporary mesh fabric that will eventually dissolve and go away by itself

#### Allo-stemsin-A™

These adipose derived MSCs have potentials to be used in different degenerative diseases.

#### Allo-stemsin-B™

Promising tool in regenerative medicine

#### Allo-stemsin-C™

treatment of ALS patients and neurometabolic disorders

#### Stemsin-A<sup>™</sup>

This product is used to treat a variety of lung diseases, including acute

- respiratory distress syndrome (ARDS)
- Stemsin-B™

for treatment of Multiple sclerosis (MS)

### HOMAPHARMED

#### Competitive Advantages:

- Supplying critical pharmaceutical needs of the Iranian market
- Transfering up-to-date technologies to Iran
- Contract manufacturing with high tech pharmacology companies
- Indigenizing manufacturing of imported medicines
- API production and manufacturing
- High-tech drug development

**About Company:** 

Homa Pharmed Company was founded in 2008, driven by one purpose: treatcancer, infertility and Inflammatory. Our main goal is to make a positive evolution in the Iranian pharmaceutical industry and provide a more suitable foundation, and supply the needed medicines to ensure the welfare of the patients. We introduced several biotechnological and biological drugs to the market. Today, our priority remains unchanged. We are dedicated to designing and manufacturing healer products, applying industry-leading expertise and high-quality standards. Building on a firm commitment to innovation and patient satisfaction, we have strengthened our presence. In 2019, Homa Pharmed accomplished new activities to import some modern technologies from reputable European companies by establishing a modern facility for manufacturing injectable forms from API to Finish Forms such as Filling liquid and lyophilized Vials (with CRABS isolator), Powder vials, PRTC, and PFS with a dedicated line for high viscosity products. Using new and modern pieces of machinery, which were designed based on PIC/S and the latest EU regulatory requirements, would be a unique plant in the country and the Middle East region. Homa Pharmed is now one of the leading companies in the pharmaceutical industry, always trying to take advantage of new technologies and according to international standards for the health promotion activities

and confirmed as a significant player in injectable drug and medical devices based on hyaluronic acid, offering practical solutions to practitioners, helping women and men who want to look and feel their best at all times elp them maintain their health and beauty in the future.

LivoGen Pharmed & SinaClon BioScience as a group of science-oriented, Biotech Companies provide several products and services to Biopharmaceutical Companies as well as medical and research laboratories. Moreover, Boomix as an accelerator helps startups build their ideas and scale up their products. Relying on many important factors including educated and committed staff, the most advanced equipment and almost all relevant certificates such as ISO17025:2017, ISO9001:2015, ISO13485:2016, and GLP licenses from the Food and Drug Administration, the Spectrum of our services and products are:

- · Quality control services to Biopharmaceutical Companies
- · Extraction and Purification kits from different biological samples.
- Diagnostic kits by qPCR method and different panels for respiratory viruses, fungal elements, cancers detection, cell culture contamination, remaining Host cell DNA, Hepatitis and Immune deficiency viruses. Our over a hundred different domestic kits and reagents bring assurance and accuracy to all end-users at diagnostic and research laboratories around the Country. Furthermore, we are proud to be a second-to-none commercial producer of:
- Synthetic oligo and probes since over a decade ago.
   Our robust triple Companies are also members and located in the Science and Technology Parks of Tehran

University of Medical Sciences, Pardis Park, University of Tehran, Tarbiat Modares University, and the Persian Gulf.

GLP license

#### Services:

- Molecular genetics services
- Cellular services
- Protein-chemistry services
- Microbial contamination detection services
- Bioinformatics services device services and space rental
- Describing the characteristics of the cell banks
- Device services and space rental

#### **Products and Services:**

Host Cell DNA Contamination (HCD) Kits:

5 HCD kits are produced to detect host cell DNA (HCD) in drugs. These kits are designed and optimized based on the technical knowledge of LIVOGEN PHARMED's specialists, are based on the sensitive Real-time PCR technique and are able to quantitatively measure the residual host cell DNA in the drug.

- The first and only manufacturer of Probes and Primers in Iran:
- 3 day Primer Synthesis
- 7 days Probes Synthesis Purification: RP-OPC or PAG Purification

Different kind of Oligonucleotides like: Degenerate,

Inosine, 10mer, Random Hexamer, Oligo Dt

- Sequencing And Big Data Analysis
- Protein Structural Analysis And Protein Engineering
- DNA Modifying Enzymesand Master Mixes
- Nucleic Acid Extraction and Purification kits
- Ladder & Protein Markers
- PCR buffers and reagents
- Qualitative PCR Detection Kits (RUO)
- Electrophoresis
- Committed to superior quality and results.
   Years of experience in biotechnology.
- Good reputation in business.
- International standards (ISO13485:2016, ISO 9001:2015).
- Contracts with government institutions, Universities, Genetic Laboratories.
- Customers like Pasteur Institute of Iran, Iran Veterinary Organization, Tehran University of Medical Sciences, Royan Institute ...

## RASTAGENE

#### Competitive Advantages:

 RastaGene Biopharmaceutical company gains a competitive edge through its strong research and development (R&D) expertise, robust intellectual property (IP) portfolio, adherence to regulatory compliance, specialized infrastructure and manufacturing capabilities, clinical development and

commercialization expertise, established collaborations and partnerships, and a diverse pipeline of therapeutic candidates. These advantages enable the company to innovate, protect its discoveries, navigate regulatory requirements, efficiently produce complex therapies, conduct successful clinical trials, and position its products in the market. Overall, these strengths differentiate the company from competitors and drive its success in the biopharmaceutical industry.

#### **About Company:**

RastaGene biopharmaceutical Co. is a local science-based pharmaceutical manufacturer that produces injectable products for Iranian hospitals, and has also retail and reference products as well as solid dosage forms in its pipeline.

RastaGene was established on January 8th, 2014. This company has acquired a scientificapproach by a highly proficient team to provide products and solutions in order to protect Iranian patients. RastaGene is now manufacturing its injectable products under contract in GMP certified facilities. These facilities have received IFDA GMP and integrated management systems certificates. New manufacturing plants are now under construction for future production model, which is shifting a big part of contract manufacturing to own-site manufacturing.

#### **Products and Services:**

Normoject

(Labetalol 100 mg)

Solution for Injection

(5mg/ml, 20 ml)

Hypertension

#### Ferolli Family

Sucroliposomal Iron supplements with the greatest Bioavailability and the least side effects

#### Teicomix (Teicoplanin 200, 400 mg)

Sterile powder for IV infusion

Serious infections caused
 Gram-positive bacteria

## Cofugen (Caspofungin 50 mg)

Sterile powder for IV infusion

 Invasive aspergillosis; Invasive candidiasis; Empirical treatment of systematic fungal infections in patients with neutropenia

#### Tamira (Levetiracetam 500, 1500 mg)

Sterile solution for IV infusion (100mg/ml, 5 ml; 15mg/ml, 100 ml)

 Therapy of focal seizure with or without secondary generalization

## Application of Products and Services:

Biotechnology and pharmaceutical products

## Rhythmosine (Adenosine 6 mg)

Sterile solution for IV infusion (3mg/ml, 2 ml)

 Paroxysmal supraventricular tachycardia

## Milocard (Milrinone 10 mg)

Sterile solution for IV infusion (1mg/ml, 10 ml)

Inotropic support in heart failure

## Famotidine (Famoject 20 mg)

Sterile solution for IV infusion (10mg/ml, 2 ml)

- Treatment of benign gastric and duodenal ulceration
- Reflux esophagitis

## Norpivive (Norepinephrine 1 mg)

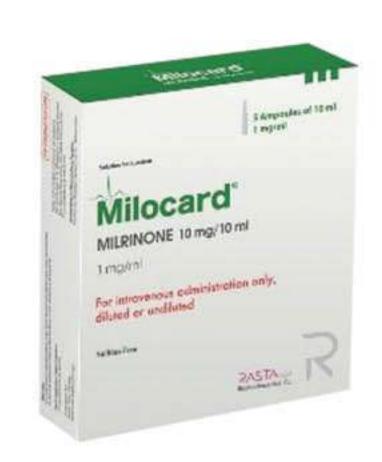

Sterile solution for IV infusion (0.1%, 10 ml)

Acute hypotension/shock

#### **About Company:**

Since 2010, Zist Darman Mahan Company in partnership with industry leaders of the production of probiotic supplements (ZistTakhmir Co.) and with the aim of achieving technical knowledge of probiotic supplement production for animals, poultry and aquatic began its research and development activities. After achieving the technical knowledge to produce these products and isolation and registering probiotic microorganisms from native resources; the company was established with the objective of industrial production in 2014. Our Company is member of Pardis Science and Technology Park. Our aim is manufacturing probiotic supplements in the massive and growing industry of livestock, poultry and aquatics in order to produce healthy food and eliminate the country's need to import. The products of the company were given to market with commercial logo BIODEP®. These products were exclusively formulated for use by all groups of ruminants (Goat, Sheep, Calves, Cattle, Lamb, ...), poultry (industrial and ornamental birds), aquatics (Shrimp, Prawn, Fish, ...), horses and pets (Cat and Dog). All products are containing powerful and specific bacterial and yeast strains of probiotics and prebiotics.

#### **Application of Products and Services:**

medication of animals (industrial animals and pet)

#### **Products and Services:**

- Bio-Poul: feed-grade probiotic supplement for industrial poultry
- Bio-Poul WS: water soluble probiotic supplement for industrial poultry
- Bio-Rumina: Probiotic supplement for ruminants
- RumYeast: Probiotic yeast for ruminants
- DiaCare: anti-diarrhea supplement for animals
- Bio-Aqua: feed-grade probiotic supplement for industrial aquatics
- **Bio-Aqua Pond:** probiotic supplement for improvement of aquatics pond water quality
- Bio-Equine: Probiotic supplement for Horse
- Probio-Pet: probiotic supplement for pet (dog, cat, exotics)
- Bio-Poul WS Ornamental Birds: probiotic for ornamental Birds
- Bio-Aqua Ornamental: feed-grade probiotic supplement for aquarium fish
- Bio-Clar: probiotic supplement for improvement of aquarium water quality
- Probio-Apis: Probiotic supplement for honey bee
- CoroPet: Pet Paw Sanitizer
- Digest-It!: supplement for ruminants indigestion
- Digest-It!+Probiotic: New generation supplement for ruminants indigestion

#### **About Company:**

Exir Nano Sina Company (ENSC) founded in 2009. ENSC is a technology-based Nano pharmaceutical company focused on the research, development and commercialization of innovative Nano pharmaceutical products based on its proprietary drug delivery technologies. It,'s strengths lie in lipid-based formulation and scale-up for parenteral, oral and topical drugs using liposomes, micelles and nanoparticles to optimize the pharmacokinetics of drugs for better efficacy and lower toxicity, and thus prolong the product lifecycle of branded drugs.

#### Company's products and services:

#### SinaDoxosome®

Used for Metastatic breast cancer, Metastatic Ovarian Cancer, AIDS-Related Kaposi's Sarcoma, Multiple Myeloma. The dosage form is injection((Concentrate for solution for infusion)

#### SinaLiv®

Used for Liver protection,
Cirrhosis of the liver and
jaundice, Liver damage and
fatty liver, Reducing toxic
effects of anticancer drugs,
Reduce the symptoms of
psoriasis. The dosage form is
Soft gelatin Capsule.

#### • Doxorubicin HCL:

Used for breast cancer, soft tissue sarcoma nonspecifichistologies, metastat ic solid tumors, leukemia, or lymphoma.

cutaneous leishmaniasis
caused by Leishmania tropica,
Treatment of cutaneous
leishmaniasis caused by
Leishmania major, Treatment
of recurrent and chronic
topical fungal infections
including dermatophytes. The
dosage form is Topical Gel.

#### SinaCurcumin®

Used for Anti-inflammatory,
Antioxidant, Immune, Joint &
Bonesinflammation, Brain
(specially Alzheimer), Liver and
Cardiovascular Health. The
dosage form is Soft gelatin
Capsule.

#### **Application of Products and Services:**

Innovative Nano pharmaceutical products based on its proprietary drug delivery technologies

**About Company:** 

Faran Electronics Industries was established in 1989 to produce electronic, telecommunication, and computer equipment.

The main focus of Faran Electronics Industries is the production and distribution of UPS, batteries, and other equipment, including stabilizers and inverters.

#### Application of Products and Services:

Power electronic industry

#### Certificates:

- CE
- · ISO9001
- · ISO14001
- · ISO18001
- IEC approved

#### **Products and Services:**

#### UPS Systems:

- Providing a wide range of solutions to ensure continuous availability of power and the safe operation of critical applications in all industries (i.e. oil and gas, chemical and petrochemical industry, telecommunication, transportation, healthcare, power generation and etc.). The product capacity begins from 1kVA to 2000kVA including line-interactive and on-line, transformer-less and transformer-base, stand-alone and modular models.
- Galaxy: Online high-frequency UPS; 100kVA-500kVA (3:3)
- Comet Plus: Online high-frequency UPS; 40kVA-120kVA (3:3)
- F600: A modular UPS with ultimate flexibility to protect mission critical applications; 30kVA-900kVA

#### Sealed Lead Acid Battery (VRLA):

- Cost-effective solution, Safe & Reliable, Wide range of capacity (2V and 12V batteries from 7Ah up to 3000Ah)

#### STB Stabilizer:

- Microprocessor controlled, rapid response, start-up delay function, high voltage and low voltage protection, over load and over heat protections.

#### Solar systems:

- Appropriate solution to improve life quality by green energy supplyincluding off-grid and on-grid inverters, solar panels and charge controllers

#### Rectifier charger:

- Designed for light industrial applications and can be installed in 19 inch standard power cabinets.

#### Electric vehicle charging solution:

- Providing high-power quick charging services for electric vehicles. Durable, robust, all-weather enclosure for indoor and outdoor using and supporting CCS or CHAdeMO standards.

## FOTROUSI ELECTRONIC

## SANATKARAN ELECTRONIC

#### Competitive Advantages:

Companies instead of spending years and spending a lot of money to achieve a technology that they may not achieve, they get help from us and we create these technologies in the shortest possible time at our own expense, and we share in their profit and risk. Due to the fact that these companies achieve these technologies in the shortest time with us, this snake is also a leader in the global market competition.

Sales Manager QR code

Phone: +98 21 76250820 - 840 - 844

Email: ehsanbehroozy@msn.com

Website: iransanat.co

About Company:

**About us:** With 20 years of experience, we are a research company with the newest technology capabilities, advanced university and laboratory equipment and research with skilled human resources, located in Iran Technology Park, similar to Silicon Valley research companies in the United States that the shareholders and the main members of the company's team have formed a very special set of geniuses and during these years by creating and presenting new technology and inventions; We were able to help manufacturing companies in various industries. In fact, manufacturing companies in various industries, after getting acquainted with our company, prefer to refer their technology needs and investment advice to us, and many universities and scientific authorities use our expertise in their projects.

Why? Because the creation of an independent research and technology unit requires spending high costs on building infrastructure, purchasing laboratory equipment and attracting elite manpower with high salaries, among other annual running costs, and .... . Therefore, in addition to high costs, a lot of time will be spent to upgrade the product and create new technology and inventions. This waste of time will cause the manufacturing company to lag behind other competitors in global markets due to the rapid development of technology and The risk of investment will increase intensity.

**Result:** So, manufacturing companies in various industries, by joining our collection, meet their technology needs and inventions with a little spending a small amount of money and in the shortest time, at the highest level of modern technologies, without risk. Our genius's talent will be with them and as a result, their investment risk 94 will be close to zero.

#### Industries we operate in:

- Oil & Gas & Petrochemical
- Equipment of Mines & Steel, siderurgy and casting
- Industrial of Automation Instrumentation Control
- Purification Home Automation
- Equipment of Telecommunication Network Data Transmission
- Equipment of Offroad & Automotive parts
- Equipment of Farming Purification
- Equipment of Water Electricity Sewage
- Equipment of Medical Power

#### **Products and Services:**

In the past 20 years, our company has succeeded in creating many technologies in various industries, but we are referring to a small number of these technologies that can be presented.

- Types of industries flow computers with the ability to measure from various sensors and advanced mathematical calculations.
- Industries monitoring with the ability to transfer data from various mobile network platforms, optical fiber, pipeline, wireless wired with advances encryption.
- Advanced industries automation equipment with native anti-hacking technology and protocols without the need for an operating system
- Industries measurement equipment and sensors, along with all types of gas, water and hydrostatic test leak detectors
- · Intelligent pigs with new technology for the first time in the world
- · Intelligent oil system with anti-hack and anti- trafficking
- All kinds of electricity, water, gas meters, with the ability to transfer data through electricity and manage energy consumption
- Laboratory and medical equipment
- · Advanced industrial robots for the first time in the world
- Types of electric cars in addition to ECU equipment
- Electrical home equipment specially wash disher, refrigerator, washing machine and others.

And we can also mention the technology of creating tens of thousands f megawatts of electricity without building a new power plant and many ultra-advanced technologies that cannot be expressed.

## QESHM VOLTAGE

#### Sales Manager QR code

Phone: +98 21 66733040

Email: info@qeshmvoltage.com

Website: qeshmvoltage.com

#### Competitive Advantages:

- Sale of equipment for CNC control systems and SIEMENS drives
- Sale of SIMENS low and medium pressure equipment
- Training industrial automation systems, instrumentation, mechatronics, and robotics
- Designing and construction of industrial control laboratory
- Production of electrical control panels
- Production of electrical switchboards fittings
- Sale of KINCO industrial automation equipment
- Sale of KINCO AC, servo and stepper motor speed control

#### **About Company:**

Qeshm Voltage founded in 2001 succeeded in representing the German company SIEMENS and in 2009 it represented the Chinese KINKO company to sell equipment, systems and technical engineering services in the field of industrial electricity, industrial automation and precision instruments. Now it provides services to consumers in various industries such as oil, gas, petrochemical, metal, automobiles, parts manufacturing, food, cement, textiles, rubber, glass, paper, chipboard, pharmaceutical, wire and cable, machine-building and professional technical centers.

#### Certificates:

- Title of high-tech company from Ministry of Industries and Mines, in 2010
- SIEMENS distributor First ranking in the automation sector, in 2007
- Ministry of Cooperatives Labor and Social Welfare approval as a workshop permit, in 2004
- Receiving a letter of appreciation from the Ministry of Cooperatives Labor and Social Welfare as a dynamic organization
- Obtaining approval for holding valid international training courses from the IB institute in GERMANY, IN 2006
- Receiving a technical engineering license and a license to establish an industrial and mining research center from the ministry of industry, mines and trade

#### Exported Markets:

- In representing the GERMAN company SIEMENS, in 2001
- In representing the CHINESE company KINCO, in 2009

#### **Products and Services:**

#### Instrumentation Educational equipment

1.instrumentation and process control training system

This panel is designed to train advanced control systems as well as industrial instrumentation equipment widely used in industry.

2. Instrumentation training system

This panel is designed to teach instrumentation and control equipment used in industrial processes

#### Robotics & Ai equipment

- 1. Industrial robot with a portable weight of up to 35 kg
- 2. Service robot:

This robot correctly recognizes the surrounding conditions, including human movements, the position of objects, and obstacles.

After placing the food ordered by the person in the robot's trays, the customer's table number is announced to the robot. The robot intelligently recognizes the obstacles, moves toward the customer's table, and delivers the food. After unloading, the robot returns to the initial point.

#### Mechatronics educational equipment

1. Mechatronics educational system:

this educational system teaches a variety of sensors, cylinders, valves and other industrial automation components such as PLC control system.

Another important feature of this set is the implementation of various educational projects in the field of mechatronics, industrial automation, robotics, etc.

The most important feature of this set is the modularity of the stations, which the student can fully implement according to the defined project and the existing manuals.

#### Solar energy educational equipment

1. SOLAR DC EDUCATIONAL TABLE:

A portable training system with magnetic boxes that Can be assembled & disassembled easily.

You can change the angle of panels & projector to learn the best angle possible. Also having a LUXMETER helps you study the Light intensity & compare it to the sun.

#### Automation, electronics and power training

1. S7-1500 Portable Educational System:

The S7-1500 Training set is designed and manufactured in a portable bag using Siemens's reputable company products.

This company is one of the suppliers working with the biggest bus and trucks manufacturers in the Middle East.

#### **About Company:**

Since 2001, Noandishan Donyaye Sanat Company involved in designing and producing all electronic components of buses and trucks.

#### Application of Products and Services:

Research, design and manufacture of electronic software, transportation and mechanical assemblies, especially in the automotive industry.

#### Certificates:

· ISO/TS16949-2002

#### **Products and Services:**

- Passenger Informing system
   The system includes monitoring the buses AVL server software, bus stop LED display, Bus Control Unit with CD player, driver's display, exterior and interior displays for buses
- Bus-stop display
   By using this device, passengers can estimate time of bus arrival and do an accurate travel, thus there will be a huge saving on using public transportation.
- Bus informing system
   Related information about the route will be announced through speakers.
- Destination display
   These digital displays show destination and bus lane number through LED for those passengers who are waiting at Bus-stop
- Interior Displays
   Interior digital display with capability of showing advertising messages, time, date, inside and outside temperature, station's name and number and stop alarm

Website: sk-electronic.co.ir

- New and modern design in the appearance and body of the products.
- High quality in designing modules and parts.
- Technical and reliable support of products after purchase and use.
- The first and only exporter in Iran.

#### **About Company:**

Sina Kavosh Electronic was established in 2000 by a team of experts, who has more than 30 years of experience in design, implementation, and maintenance of microwave networks. Sina Kavosh is the first and only Iranian company that is active in designing and manufacturing of dehydrators. Its products includes dehydrators for microwave networks. Consequently, the designing team helped them in developing high capacity dehydrators, which are suitable for broadcasting transmitters (both FM and TV)

#### Application of Products and Services:

#### **Products and Services:**

DIHYDRATOR SD-2004

Is suitable for microwave networks.

DIHYDRATOT SK-204

This device is suitable for TV, FM radio transmitters and radars.

DIHYDRATOR SK-208

This device is suitable for TV transmitters, FM radios and radars.

 Temperature and humidity control of HT-75 model

105

Is suitable for telecommunication halls with capability of ambient measurement temperature in terms of celsius and pure moisture in percentage.

Automatic Line Voltage Regulator

Applicable in Scientific Research, testing, Industrial machinery, manufacturing factories, elevators, hospital and biomedical equipment such as radiology

devices, MRI, sonography, telecommunication and broadcasting stations.

Espresso machine

Sina Kavosh Electronics has initiated its endeavour in the commercial food equipment industry since 2022. The single group espresso machine is Sina Kavosh's first product under Lamassu brand.

Despite its recent launch, Lamassu espresso machine is in-par with espresso machines of well-established international brands in terms of quality and performance. This product is a perfect fit for cafes, restaurants and offices as well as households.

#### About company:

Royal Tosse'e Paydar (RTP) Co. Ltd, is a knowledge-based company in the fields of robotics and flexible electronics.

Competitive advantages:

consumption

RTP has a variety of robots in the field of rehabilitation, service robots, and various types of flexible heaters.

#### Products and services:

- RTP products are as follows:
- K1 LifeBot Mobile Robot
- Armtin Manipulator
- Treata Rehabilitation Robots
- Flexible Heaters (car seat heater, mirror demister heating pads, heating belt, heating blankets and ...)
- Flexible Sensors

#### Application of products and services:

Automotive industries, Healthcare.

#### Certificates:

CE, Nanoscale certificate

#### **Exported markets:**

China, Iraq, Qatar, Russia, South Korea

#### **About Company:**

FANAP Company was established on January 15, 2005 with the investment of PASARGAD financial group. Its first mission was to design and to prepare native Iranian banking solution. Thanks to this success, FANAP expanded its activities in the information technology industry by providing comprehensive banking, financial and insurance solutions, stock exchange and financial processing management.

Later on, the next generation of FANAP's products, services and capabilities were introduced that included the launching of the first internet TV in Iran, designing and implementing an ERP (enterprise resource planning) in the form of the biggest software project of Iran and launching the center for innovation and acceleration of startups and finally, contributing to the government's mega projects in technology, including IoT, blockchain and AI, which are now categorized into the four technology sectors of lifestyle, industries, finance and communications, working as FANAP LIFT.

FANAP, with 15 subsidiaries, 30 SBUs and 75 startups, is committed to create a smart lifestyle for organizations and end-users, using the two wings of innovation and technology.

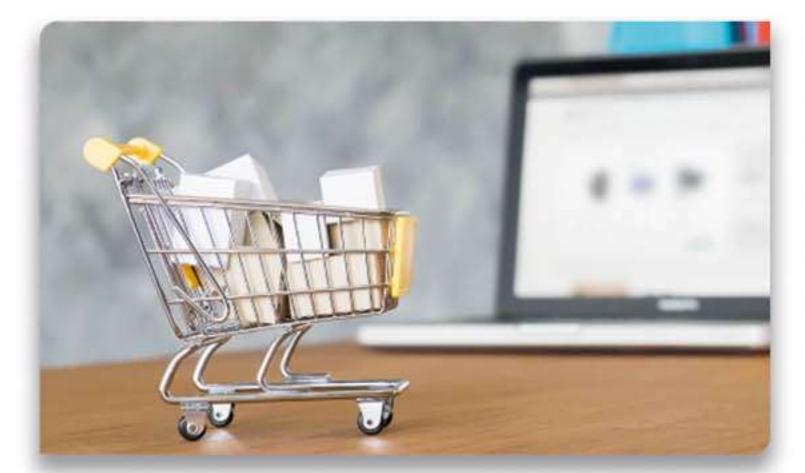

#### Certificates:

- Ranked 1st in 14 Categories at the Supreme Informatic Council
- Knowledge-Based Certificate from the Vice-Presidency of Science and Technology
- Research and Development Certificate from the Tehran Industry,
   Mining and Trade Organization
- Permit for Developing and Implementing Software from the Ministry of Industries, Mining and Trade
- Best Technology Unit at Pardis Technology Park in 2019 and 2021
- Best Software Company at the Evaluation of the Ministry of Industries in 2019
- A Letter of appreciation from the 5th Social Responsibility Awards in 2020, Awarded by Iran Management Association
- 6 Subsidiary companies rated among the Top 500 Companies in Iran in 2020, as Evaluated by Industrial Management Organization
- Titled "Pioneering Company"
- among Pardis Technology Park companies in the fields of "technology production and development" and "organizational growth and promotion"
- Award of Knowledge Management at the third International knowledge Management Conference KM4D
- Silver medal at ICAN 2020 by "PAYAB"; Smart system of online detection, and alarming of water leakage in plumbing system, and managing of water usage"
  WSIS Innovation Champion titled Linkap as the champion project of 2021 WSIS in Geneva
- \$100,000 award from Google Startup Program by Vidubia
- Gold Medal from RSA 2020 South African Science and Invention Festival by Himad Team

Attractive products in different technology areas

#### **About Company:**

Hasin Group was founded in 2004 by a number of Sharif University students who were members of 'The Young Scientists Club'. After two decades, the company has established and supported over 10 business companies with 700 employees. Today more than 70 million Iranians are using Hasin Group services directly and indirectly. their clients include individuals, companies, and business owners.

#### **B2B Products:**

- Alin: The company started its activity in 2013 with the aim of being in the payment industry, value-added services and customer loyalty solutions, and is currently engaged in providing services in these areas with various products and services.
- Hasin Gostar Pardis: Is known as the largest supplier and producer of smart cards and SIM cards, supplying and producing more than 140 million smart cards and SIM cards in the country.

Also, this company is considered one of the key players in bank payment in the field of supply and production of hardware and software for the payment industry. Hasin Gostar Pardis has a history of supplying and producing more than one and a half million countertop, contactless, and mobile point of sale terminals (POS) of Castles and Aisino brands.

- Radin: Since 2007, Radin Company has been providing native software and hardware solutions, electronic payment, electronic banking, telecom, information technology security, data analysis, artificial intelligence and blockchain to banks, organizations, and institutions.
- Exon: This company started operating in the field of mobile phone wholesale in 2021. After gaining its reputation in the market, Exontel's online store was launched. A wide variety of products, and reasonable prices are the distinguishing features of Exontel compared to online market competitors. The mission of this company is to provide competitive prices and fast and regular shipping throughout Iran.
- Tejarat Gostar Fakhim: Is an import and export company that started its activity officially in 2006 and since 2019 it has started importing and distributing the country's main mobile phone brands. To add more value, Vira Service was established in the field of mobile after-sales services.

#### **B2C Products:**

- Myket: Is an Android app store with more than 40 million active installations, 20 million active users, and 150 million monthly searches record.
- Magnet: Magnet online advertising network started its activity in 2014, focusing on advertising on mobile platforms and Android applications. Today, as a digital marketing agency, Magnet provides various advertising services to more than 40 million users.
- Taaghche: started its activity as a digital platform with a large number of electronic and audiobooks in 2013. One can have access to a whole library with a subscription. Taaghche also offers printed books that can be sent all over the country. Gooshishop: is an online store with more than 17 years of continuous and successful presence in Iran's E-commerce field, that offers the latest models of mobile phones, tablets, etc.
- Taraabarnet: As the largest intelligent system of freight transportation in Iran, Tarabaarnet started its activity in 2016. By making the traditional road transportation system smarter, it has increased the speed and ease of transportation of freights.
- Mani: As a financial service provider platform, itstarted its activity in 2022, customers can easily apply for credits in the Mani application and use the received credit in specified stores.

#### **Application of Products and Services:**

Electronics and software, providing software and services for smart cards, SIM cards, POS machines, etc.

# FANAP INFRA

#### Competitive Advantage

- Experience in implementing large projects
- More than 900 expert and technical employees
- Rank 254 among the top 500 companies in Iran

Sales Manager QR code

Phone: +98 21 91033300

Email: info@fanap-infra.com

Website: fanap-infra.com

#### **About Company:**

Fanap Infrastructure Company, as the first intelligent industry operator, with a brilliant background in implementing large-scale projects, and with the support of more than 900 expert employees, accompanies various industries on the path of digital transformation and also the creation of information technology infrastructures.

The output of large-scale projects that have been completed in Fanap infrastructure shows that the achievement of taking advantage of the benefits of digitalization in various fields is the prosperity of businesses.

#### **Products and Solutions**

- Comprehensive enterprise resource planning (ERP)
- Smart solutions on IIoT
- Network infrastructure integration
- Smart transportation (plate reader)
- Data center design and implementation (large scale)
- Industrial video surveillance

#### **Products and Solutions**

#### Data centers

With the support of years of experience in designing and setting up large-scale data centers as well as data centers of industrial complexes, we are one of the leading companies in Iran that provide these services in a complete way from design and supply of equipment to implementation, support and maintenance.

#### Smart video surveillance

In the field of video surveillance system implementation in industrial environments, with the support of expert forces and years of experience in various industries, we carry out all processes from supply, design to placement of surveillance cameras.

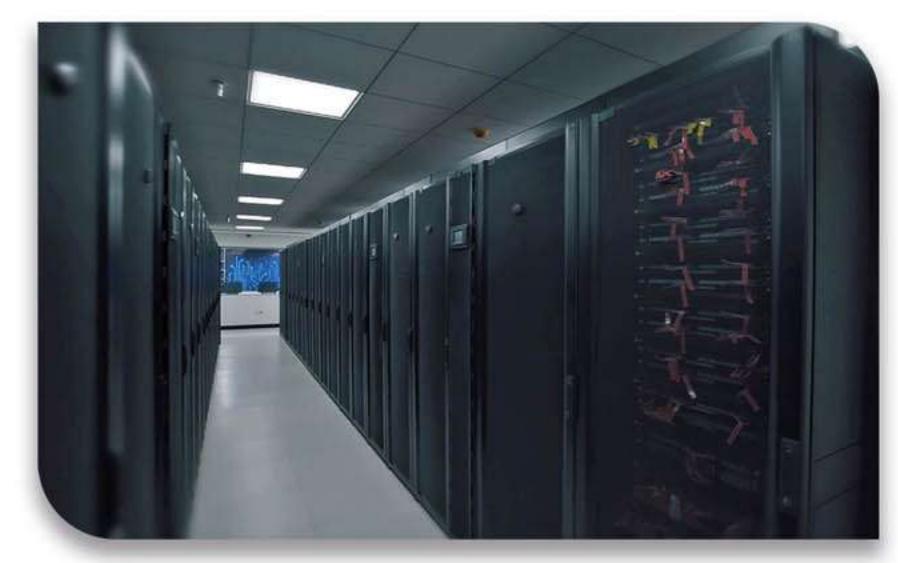

#### Intelligent Transportation System (ITS)

Our license plate reader system, with the name "Behkhan", is a product that provides all the services of car traffic control and management, as well as registration of all types of violations (unauthorized speed, passing a red light, entering a traffic plan, etc.) based on license plate recognition.

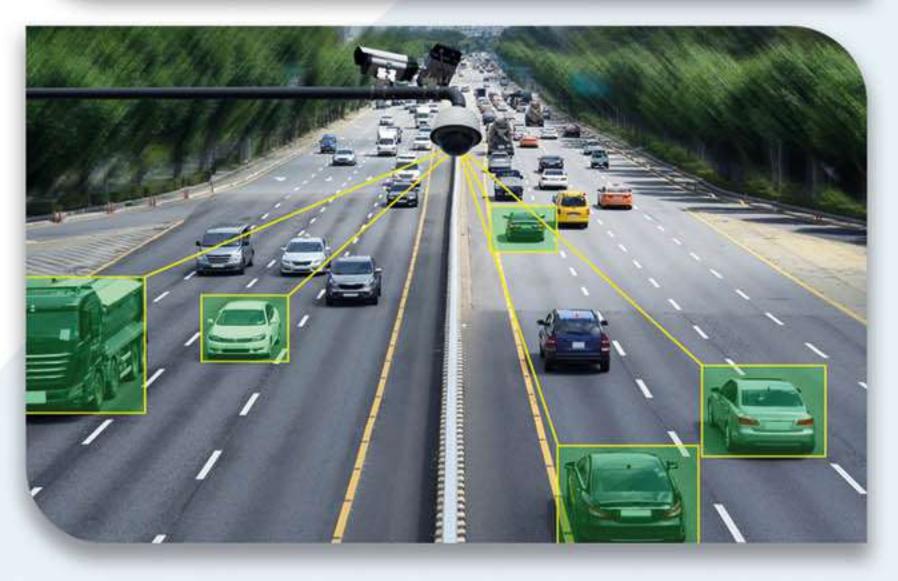

This system includes two parts of software solution and license plate reader cameras.

#### Industrial intelligence

As the first smart industry operator, Fanap Infrastructure offers various solutions for digital transformation and smartening in Industry 4.0 such as: mining, agriculture, energy and health.

Website: phpk.ir

More than one hundred successful projects.

 Builds the most advanced devices and intelligent software and uses the best technologies in the world

 Uses creative and diligent personnel and complies with originality and honesty, commitment and customer orientation.

#### **About Company:**

PARS KAREN company started its activities in the field of telecommunication systems and network security in 2005. It has invested in the construction of the integrated control and management systems (ICSS) and has now been able to integrate artificial intelligence and the Internet of things (IoT) processes for monitoring systems in industry, agriculture and buildings.

#### Pars Karen Smart Home System

The Pars Karen smart home system is a network of interconnected devices and technologies in a home environment that enables automation, control and monitoring of various functions and devices. This system is designed to improve convenience, security, energy efficiency and comfort for homeowners.

#### Pars Karen inaccessible places control system

Real-time remote monitoring and control of mines, tunnels, telecommunication channels, electricity, gas, water and hard-to reach places

#### **Application of Products and Services:**

In the field of telecommunication systems, network security, industrial automation and custom hardware and software

#### Intelligent machine room system

The Pars Karen machine room system enables real-time detection of the status of machine rooms, water and gas lines. Through the use of artificial intelligence, the control system also

responds immediately to unforeseen events, effectively mitigating potential damage and risk.

### Comprehensive system of Pars Karen smart greenhouse

There is no need to hire multiple workers for guarding and security, fertilizing, watering and other necessary issues to grow your crops. Pars Karen's intelligent remote-control

system can significantly reduce the cost of hiring personnel in the above cases. In Pars Karen's comprehensive intelligent greenhouse system, all collected information and data is analyzed and made available to the employer. The employer makes the necessary decisions based on the analysis, and by using artificial intelligence, all work can be assigned to the system.

#### **Exported Markets:**

Cooperating with UKRAINE and OMAN companies

#### Comprehensive system of Pars Karen smart

You no longer need to hire multiple employees for guarding and security,

fertilizing, watering and other tasks necessary for growing your plants. Pars Karen smart remote-control system can significantly reduce the cost of hiring staff in the above cases. In Pars Karen's comprehensive intelligent greenhouse system, all collected information and data is analyzed and made available to the employer. The employer makes the

necessary decisions based on the analysis, and by using artificial intelligence, all work can be assigned to the system.

#### Command line of the eight intelligent channels of Pars Karen

With the help of Pars Karen's intelligent command line, you can remotely access all your electrical appliances. Not only can you turn electrical appliances on and off, but you will also be informed about their health status using Pars Karen's central control panel. You can enter any programs and scenarios for automatic control of appliances

# PION ARIA

#### pxonarxa

Sales Manager QR code

Phone: +98 935 2767153

Email: hhm@pionaria.com

Website: pionaria.ir

#### Competitive Advantages:

Considering that Pionaria has focused on its products in the 5 GHz band, It can be said that the most important competitive advantage of the mentioned products is their frequency range.

Wilink antennas cover from 4700 to 6500 MHz.

Pionaria is the only company in Iran that covers this wide frequency range with high efficiency.

This feature helps the technical teams to get rid of noise pollution to implement their projects better than before.

#### **About Company:**

Pionaria started its activity in 2005 with the aim of providing quality products and suitable services in the field of radio communication. This company has always tried to cover all the needs of customers related to wireless communication.

The company currently offers more than 30 different product models, including antennas, radios, and peripherals to its customers. Through these products, all kinds of communication needs are covered from a simple and cheap communication to professional solutions for organizations and large companies.

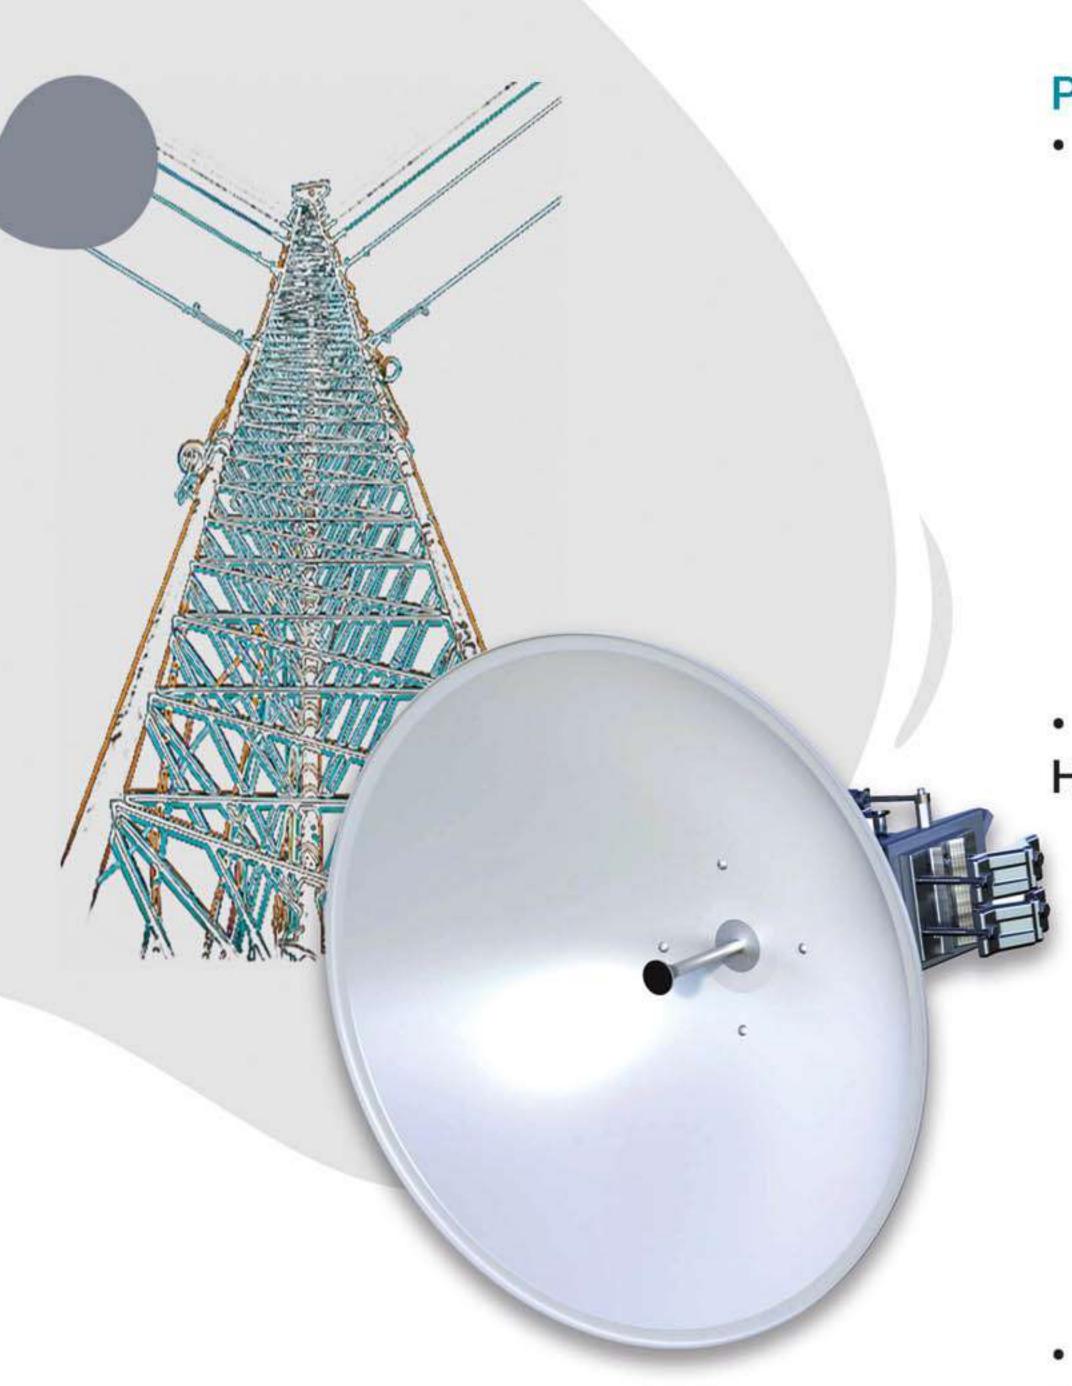

The design and production of antennas, especially in the 5-6 GHz frequency band, is one of the main activities of Paionaria, which has been marketed under the brand name WiLink since 2007.

It is worth mentioning that Pionaria can produce products in other frequency bands such as 3, 4, 6& 7, 11,13, 15, 18, 23, 24, 38 and 42 GHz and E-Bands.

The efficient research and development team of this company has been able to improve the quality of products to such an extent that it is simply competing with well-known brands in the country.

The presence in the regional and global markets was achieved for the first time in the shadow of the efforts of the sales and marketing department in 2019. So far, WiLink antennas have been exported to Australia, Hong Kong, Saudi Arabia, Pakistan and Iraq. The supply of radio products, along with Wilink antennas with the reliable brand InfiNet, is one of the other axes of Paionaria's activity.

Solid Parabolic Dish (SPA series)

 High Performance Solid Parabolic Dish High performance anti-noise antennas

Radios
 Infinite wireless radios

#### Application of Products and Services:

CCTV, Construction activity, Enterprise Backhauling, Train-to-Ground, Smart farming, Enterprise Backhauling

#### **Exported Markets:**

So far, WILINK antennas have been exported to Australia, Hong Kong, Saudi Arabia and Iraq.

The company's Infrastructure and close communication with customers, has made it possible to identify opportunities and to discover the future

needs of organizations.

 This company has prepared solutions for the organization in the most creative way and at a competitive price.

#### **About Company:**

This company was established in the field of telecommunications in 1996. Dynamics, innovation and vitality are among Guyana's R&D characteristics. The company goes through the stages of conceptualization, hardware and software design, and prototype building in close contact with customers. This company specializes in offering solutions in the most creative way and at a competitive price.

#### Application of Products and Services:

Designing and production of technology-based telephone switch equipment.

#### Certificates:

- Member of PARDIS Technology Park
- Confirmation of knowledge base from the Vice- Presidency for Science and Technology
- Member of Iran Telecommunication Industry Syndicate
- Confirmation of Iran Telecommunication Company
- Member of Supreme Informatics Council of Iran
- License from Ministry of Industry

#### **Products and Services:**

#### GHX-IP-based call center platform:

The GHX system is an IP-based telephony platform. It creates a variety of telecommunications solutions and covers a wide range of telecommunications needs.

#### GBS-Billing and charging system:

The solution of calculating and issuing bills of exchange has many advantages for large organizations.

#### GVP-VOIP hardware phones:

This hardware phone is a native and efficient product that provides users with various capabilities. This phone has been produced in two models with managerial and expert use. Clear sound provides a pleasant communication for users.

#### GCN-Operator Console:

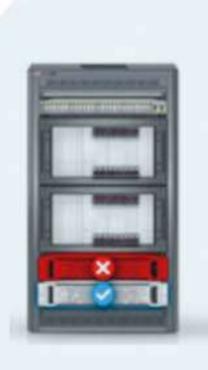

This powerful Operator Console provides a powerful tool for call center secretaries and operators.

#### GTX-Call transit system:

Large organizations need robust and highly reliable solutions to perform transit operations on the network. GTX solution to provide stable high-capacity transit service.

#### GHP-Hospital call center system:

Efficient communication is one of the most important pillars in hospitals and medical centers. The system with various capabilities provides a favorable hospital for effective and reliable hospital communication.

#### **About Company:**

The AIMS Control industrial group was established in 1993 and is located in Pardis Technology Park, the most advanced technology Park in Iran. The main subsidiary company of the group is GSN-Pars. The industrial group is officially covered by Amirkabir University of Technology (Tehran Polytechnique). GSN pars comprises known expert and experienced research team. Based on the intelligent artificial, the company offers the most advanced ITS products for in city and urban security and traffic violation control and management which brings tranquility to the population. The technologies of our products are patented internationally. The pride of AIMS Control industrial group is the authenticity of products based on the most advanced technologies and artificial intelligence.

#### Specification of GSN-RC401

- · Takes a picture of all passing vehicles including the drivers (with timing and date).
- · Records license plates of all passing vehicles and counts all passing vehicles.
- Record the instantaneous speed of all types of cars, buses, trucks, and motorcycles from 1-300 km per hour with 99% accuracy. Records average speed of all vehicles passing two GSN-RC40, intelligent traffic security and traffic violation control device.
- Online announcement of passing any vehicles demanded by security forces or traffic police.
- Online monitoring of the area.
- Possibility of emergency vocal announcement by security and traffic forces from the GSN monitoring center.
- · Works well in all weather conditions
- · Accurate headways distance measuring of all vehicles.
- Ability to read approaching and departing speeds
- · Classifying all offending vehicles and assigning maximum speed to each class
- Allocation of speed to different lanes (Multiple Lane Multitarget)
- The ability to provide images of cars, derivers and their license plates even at night and at very high speeds
- Photo of the car without license plate or with distorted license plate along with their speed
- Ability to flash for illegal speeds
- The maintenance is done online
- The power consumption of the device during the day is 40 watts and the power consumption of the device at night is 60 watts
- Ability to recognize motorcycle license plates.
- Ability to send data simultaneously to the desired centers
- Simultaneous reading of several license plates in one image
- Online reporting of any license plate manipulation or covering.
- The machine can be adjusted for red light crossing or unauthorized STOPS.
- The possibility of detecting the violation of passing a red light
- The possibility of detecting a stop on the crossing line
- The possibility of speed measurement for all cars passing through the intersection
- Ability to detect reverse gear movement in four ways

Ability to detect right turn or left turn

## The latest developments in ITS and traffic security technology:

The most advanced 4D traffic radar, GSN-KR4D is designed and manufactured by GSN Pars company with automatic removal of Doppler ghost. Our All-in-One product, GSN-RC401 is designed and manufactured in accordance with the World Health Organization (WHO) standard. The all-in-One intelligent device brings traffic security and drivers tranquility in cities and urban areas as well. A great majority of traffic mortalities and

injuries are due to excess speed limits and lack of respecting the headways distances. With GSN-RC401, any speed violation or headways distance violation is controlled accurately. The GSN-RC401, all-in-one intelligent machine can be modified for red crossing or unauthorized STOPS.

#### ITS systems for managing and improving traffic quality License plate reader camera for all cars GSN-LPR401

### General specifications of the license plate reading system GSN-VLR401

- The possibility of filming and taking photos of the route
- Automatic detection of additional objects on the path
- · Detecting movement with reverse gear and reading license plates of violators
- The possibility of tracking cars that do not have real license plates.
- The possibility of defining different zones and intelligent monitoring of the route
- Presentation of management graphs of instantaneous speed, average, etc.

Evarplast founded in 2004, as a knowledge-based and the only manufacturer of Hot Air Tools and Heating processes, Plastic Welding Machinery (Automatic and Handy Tools), Packaging Machines, and Hi-tech refractory ceramics in the MiddleEast, that during more than 20 years of successful experience in production and with its Innovative Industrial Ideas supporting producers and developing widespread applications in more than 80% of industries.

- Hot air tools and blowers
- Industrial inner heaters and heating process
- Automatic plastic welding machinery
- Packaging machinery specifically the tunnel shrinking with the feature of lowest electricity power consumption
- High-tech industrial refractory ceramics

#### Industries:

- Thermoplastic welding
- Civil and construction
- Oil, gas, and petroleum
- Automotive
- Wood and furniture
- Electronic and tele-communication
- Railway and Locomotive
   Home and appliance
- General purpose for the most uses

- Food and dairy procees
- Beauty and cosmetics
- Health and medical
- Textile engineering
- Print and packaging

### Application of Products and Services:

- Welding the different kind of thermoplastic pipes and fittings like PVC, PE, HDPE, LDPE, PA, ABS, ...
- Welding different kind of thermoplastic sheets like geo-membranes, tents, and floor covering (sportive, hospital, automotive and wagons)
- Lining and isolation of the underground foundation, structures, waste water lagoons, and transmission lines
- Manufacturing the water storage tanks and reserves, the anti-acid tanks applied in plating process, artificial pools, lakes, and fish growing pools
- Packaging machinery, specially tunnel shrinking (cap, label, sleeve, and shrink pack tunnels) with the feature of lowest electricity power consumption
- As a preheat tools in heating and forming process
- Coating kilns, Industrial or semi-industrial dryers and furnaces
- Tube filling machine, profile wrapping and limitation machines
- General applications in facilities maintenance, pulling out and remove locked screws, bolt and nuts, wiring harness, shrinking the connectors, end cables, and thermo-fit, drying the liquids penetrated in circuits.
- Complex ceramic heating elements that can be used in all heaters, blowers and industrial hair dryers, Specially in Heater and Hot Air Blowers of EVARPLAST
- Thermal Ceramic heating elements used in aseptic packaging machines, especially for closing the top and bottom of

carton bags of Milks, Juices, beverages and

- Used in CIP and SIP unit process of dairy industry
- Thermal and refractory insulations
- Thermal processes above 1600 ° C
- Electrical insulation and insulator in high frequency and high voltage systems
- Ceramic catalysts used in the oil, gas, and petroleum Industries
- Cup-locks & filters ceramics and ceramic washers
- Packing machines and hood shrines
- Ceramic balls
- Electric ovens

Rank A-3 certificate from Association of Banking and Credit Investment Consultants in feasibility studies and supervision for high-tech and sophisticated projects

Integrated Management System based on ISO 9001: 2015, ISO 14001: 2015, OHSAS

# SHAYAN FANAVARAN

# Competitive Advantages:

- High quality products with competitive prices
- Customization of Shayan products according to the customer requests
- · Joint venturing in big construction projects worldwide
- · Easy sales terms and conditions
- 10 years after sales service
- one year unconditional warranty
- Training operators and maintenance technicians for free (+ on the job training)
- · Container service (which includes all the necessary spare parts of the machinery)

# i

#### **About Company:**

Shayan Fanavaran (technology based) company, as the manufacturer of tunneling machinery such as Roadheader, Underground loaders, Belt conveyors and etc, and also explosion proof equipment and accessories with ATEX certificate for utilization in underground Coal mines, based on technical knowledge and technology, is able to customize production of such machineries in accordance with international standards for mechanized tunneling in urban and non-urban , including underground mines, water and waste water, roads, railways, under passes, subways, electricity, energy and etc.

- roadheader
- Side Loader Dumper
- Belt Conveyor

 explosion proof equipment and accessories such as junction box, cable glands, emergency stops, signal lights, push buttons, gas detectors and etc

#### **Application of Products and Services:**

- Designer and manufacturer of tunneling and underground mining machinery
- Designer and manufacturer of explosion-proof equipment and accessories for petrochemical, gas, oil industries, and also coal mine
  - Designer of gas monitoring systems
  - Designer of lighting networks

#### Certificate:

QAN, ATEX (traceable to European CE)

## MAPSA

#### Competitive Advantages:

Benefiting from a capable team of experts and highly experienced engineers from different industrial backgrounds.

Phone: +98 21 43649000

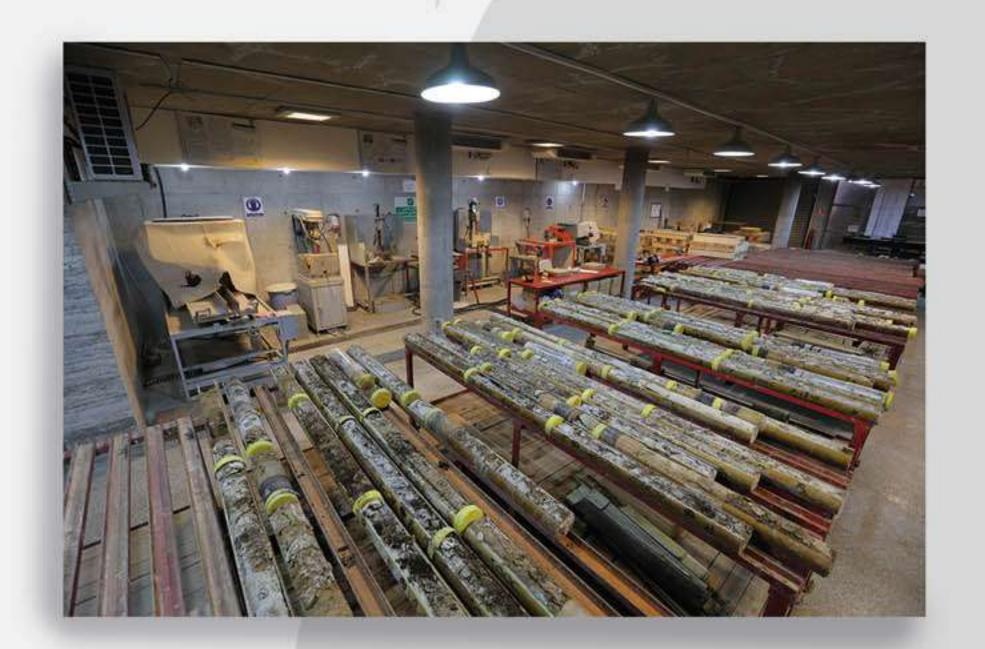

Email: info@mapsaeng.com

Website: mapsaeng.com

#### **About Company:**

MAPSA Co was established in 1999. Our company's main activities are industrial project management in numerous ways, such as MC, PMC, and performing engineering work on industrial & oil equipment.

- Drilling, Mud logging, Hydro test workshop, H2S safety services according to international, & domestic experiences and technologies.
- Coring Services
- Reservoir Engineering Study
- Geology and Geophysics services
- Inspection
- Project management Consultancy
- Water and Energy services
- Training
- Software development
- Master development
- Core analysis laboratory
- Production of water desalination systems

#### Application of Products and Services:

Engineering affairs on the industrial & oil equipment

#### Certificates:

- · ISO 9001-2000
- EFQM
- · ISO 17025

## SUDO-CO

Website: sudo-co.net

#### Competitive Advantages:

High-tech low prices products

#### **About Company:**

Soudeh Kooh-e Pardis as a knowledge-intensive company was established in 2011. The history of the founders of this company in the CNG industry dates back to the 1990s. About 30 years of commercial and industrial history with the help of young professionals promises a bright future for this family business. Mobilizing and completing the production line and testing equipment have been done continuously over the past years in accordance with the standard requirements of top brands. The process of building trust and continuous growth of the company has been done relying on local technical knowledge. Successful performance of CNG refueling nozzle and other parts produced by this company in all tests have led to obtaining a CE Certificate, a certificate of conformity with national and international specialized standards for all equipment produced by the company. In this way, all SUDO-CO products were introduced to specialized NIOC approved oil vendors list (AVL) in 2018.

# Heavy Duty in line Breakaway SU2-8BR (DN 8 mm)

Long life, heavy duty, corrosion resistance due to stainless steel components

- High flow capacity
- Safe according to European standard PED 97/23/CE.
- Design to be used in environments according to ATEX 94/9/CE
- Tested according to: ANSI/IAS NGV 4.4, CSA 12/54 2014 INSO 20887

#### Breakaway Spec:

Disconnection force: 300-600 N (inline application)

- Working pressure 0-300 bar
- Service temperature:-40°C to +80°C
- Large flow capacity: 2600 Nm3 /h

#### Application of Products and Services:

Supplies CNG related products

#### Refueling Nozzle NGV1 SU08-NZ

Application: Light, medium & semi-heavy vehicles fast fill, time fill & overnight fill-ing

#### Features:

- Safe according to European codes and standards CE certified & international and national Iranian standard.
- Durable because fully anti-corrosion high alloys components.
- Special formulated sealing materials for natural gas application.

#### Nozzle Spec.:

- NGV1 profile compatible with CN Grefueling nozzle
- Type2/3 for fast filling-slow filling application
- Tested According to: ISO 14469-1 (200 bar filling pressure) ISO 14469-3 (250 bar filling pressure) ISIRI 10705-3
- Complies with directive PED 97 /23 / CE
- Designed to be used environments according to ATEX 97/9/CE

#### Certificates:

CE

### Trunnion Ball Valves SU7460-S1

There are many products for conventional applications in the market but most of them are not fit for CNG refueling purposes because of highly varied pressure and temperature changes during fueling cycle, high pirating cycle quantity, high risk of mechanical damage and safety requirement.

#### SUDO-CO 3 way ball valve

Type: SU-7460-S1

Size: DN 5

Service pressure range: 2-250

Bar

Temperature0 range: -40°C to

+85°C

# KARAFAN PARDAZ MOBTAKER MANA

#### Competitive Advantages:

- Significant financial savings due to the prevention of hydrocarbon wastage
- Long service life due to non-contact sensors
- Reducingenvironmental problemscaused by hydrocarbon depletion in the environment

#### **About Company:**

This company was established in 2010 with the aim of inventing, localizing and commercializing new technologies and modern sciences in the industrial uses. The company's capabilities are in the field of implementation of instrumentation systems, signal processing and communication technology.

# Application of Products and Services:

Instrumentation systems, signal processing and communication technology, products passing through oil pipelines is automatic

#### **Products and Services:**

- Tank Dewatering System: Automatic drainage system of hydrocarbon reserves
- SDRP-K761Processing board: be used in various systems such as

transceivers, radar systems, creating or receiving various signals such as TV Broadcast, Cellular, Wi-Fi, FM

 Automatic Hydrocarbon Tank Dewatering System Model: AHTDS-V02

This product can be used for draining water and sludge from the bottom of tanks and Roof Draining in the following industries:

Oil and gas refineries, Petrochemical industries,

Storage Tanks of Distribution network, Export platforms and ships,

Fuel tanks of power plants, Oil Extraction industry. This device has technical approval and Atex safety certificate.

# PISHRO SANAT PARS PARS PART

#### **About Company:**

PishroSanat Pars Part (PSPP) is a supplier of engineering, manufacturing, installation and life-of-field support of surface wellheads, tress and drill bits to oil and gas industry delivering leading edge technology and solutions to its clients. Established on 2005 in Iran, PSPP develops solutions with focus on cost-efficient products and tools and optimization of operational cost. We offer complete range of surface wellheads, trees, gate valves, actuators, PDC drill bits and other equipment required for surface well completion.

Our products and quality program comply with applicable international codes and standards such as API and ISO. PSPP views quality, simplicity and reliability in design as a basis for the success in its business.

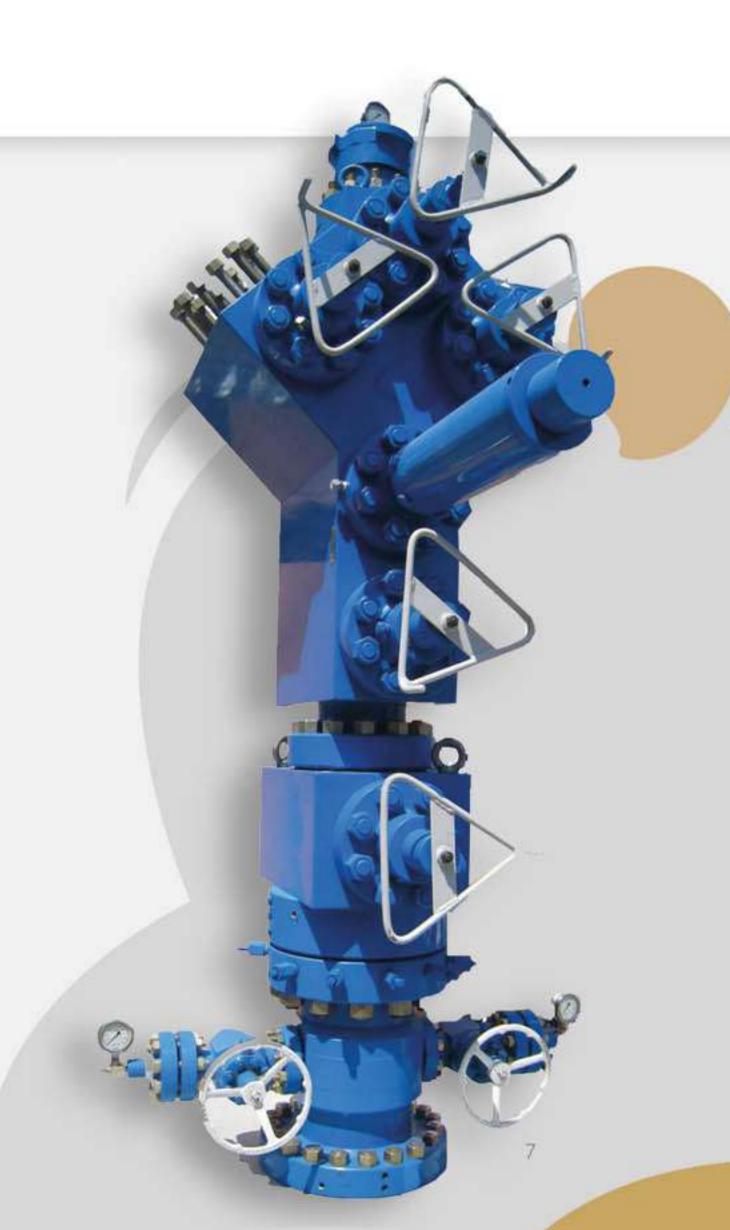

PSPP produces wide variety of wellhead and X-mas tree types and designs including but not limited to:

Conventional wellheads

ESP wellheads

Unitized wellheads

- Horizontal wellheads
- Splitted and Dual completion wellheads

#### Components:

#### Wellhead:

- Casing Head Housing
- Casing Hanger-Slip type KSB1
- Casing Hanger-Slip type KSB9
- Tubing Hanger
- Tubing Hanger & Hanger with Latch Mechanism
- Double Stubbed Adaptor
- Tubing Bonnet Adaptor

- Casing Head Spool
- Casing Hanger-Slip type KSB2
- Tubing Head Spool
- Tubing Hanger-ESP
- Double Stubbed Adaptor Pack-off
- Tubing Bonnet Adaptor-ESP

#### Production:

- Chock Valve & Tree Top Adaptor
- Actuator
- Surface Safety Valve
- Gate Valve
- X-mass Tree
- Master Valve
- Metal Seal Career

#### Accessories:

- Lockdown Screw
- Combination Tool & Bore Protector
- Bull & VPR Plugs and Lockdown Screw
- Blind, Weld-Neck & Companion Flanges

#### Licenses and Certificates:

- HSE MS
- ISO 14001:2015
- ISO 45001:2018
- ISO 29001:2020
- ISO 9001:2015
- Fire Test Qualification Certificate
- PR2 Test Certificate

#### **Products and Services:**

Wellhead Equipment and X-mas Tree

Products:

Pressure ranges: 3000 – 15000 psi

Material classes: AA, CC, DD, FF & HH

Casing heads and Tubing heads

Casing & Tubing hangers

Flanges (Blind, Companion, DSA, DSA pack-off,

Weld-neck, Adapters)

Spacer & Adapter spool

Tee, Cross & Elbow

Tree top adapter (Tree cap)

Swept bend

Valves (Manual gate valve, Safety valve,

Composite valve, Chock valve, Check valve)

Accessories (Bull plugs, VRP, BPV, TWCV, Ring

gaskets, Fittings, Instrumentations, Seals)

Running & Test tools

Wellhead Systems:

- Conventional
- Unitized
- Multi-Completion
- ESP

## ARA RESEARCH

#### Competitive Advantages:

High quality with competitive price

Phone: +98 21 76250186 - 7

Email: info@ara-research.com

Website: ara-research.com

#### **About Company:**

Ara Research was established in 1998, with the aim of providing the latest technological apparatus needed in Nano research and Nano applications. Working with innovative qualified researchers and the most advanced engineers in the past 20 years, has helped us to pave the path towards

becoming the top regional-producer in this field. Today Ara Research can well compete quality wise and pricewise with the best known world brands of AFM and TEM.

• ARA-AFM: has been in the market since 2014 and 90 systems have already been sold and over 500 credited papers have been the result of researches performed in the field of nano technology. Two different models of ARA and Bio AFM carrying 14 functional modes of Atomic Force Microscopy categorized in 3 different kits, fill the AFM basket products of Ara Research Co.

• ARA-TEM (Transmission Electron Microscope): has attractive features of Dark-Field, Bright-Field and SAD with magnification up to 400,000X and power of 50 & 80 KV, aimed for biology, medical science, material science & engineering applications

#### Application of Products and Services:

Nano-imaging, Nanoscale determination of material properties, Nanolithography and Nano manipulations in scientific and industrial fields

#### Certificates:

- · ISO 9001
- · ISO 10004
- OHSAS
- · COP

#### **Exported Markets:**

China, Russia

# ILYA SCIENCE & TECHNOLOGY DEVELOPMENT

Sales Manager QR code

Phone: +98 21 76250359

Email: info@ilya-corp.com

Website: ilya-corp.com

#### **About Company:**

ILYA Knowledge & Technology Development Company was established in 2010 as a member of Pardis Technology Park and managed to get the approval of the Vice Presidency for Science & Technology to become a knowledge-based company. We work in the field of research and development and production of catalysts and nanostructured materials, the most important of which are as follows:

- Naphtha reforming catalyst
- Nano-based diesel fuel additive
- Oxidative dehydrogenation of Propane
- Isomerization catalyst

Nano emulsion fuel

The specific field of activity of the ILYA research and development company includes product manufacturing, technical expertise, and production line in the following areas:

#### Precious Metal Nanocatalysts:

- a. IR110: Nanocatalyst for naphtha reforming used in refinery SR units.
- b. IR235: Nanocatalyst for naphtha reforming used in refinery CCR units.
- c. IR139: Nanocatalyst for naphtha reforming used in petrochemical CCR units.
- d. IR109: Nanocatalyst for naphtha reforming used in petrochemical SR units.
- e. Isomerization Nanocatalyst: This product, based on platinum catalysts on alumina, is used in the light naphtha isomerization process. Its main function is to activate the conversion of linear hydrocarbons into branched ones and increase the octane number by producing isoparaffins.
- f. IDEH: Nanocatalyst for hydrogenation of paraffins. It converts heavy paraffins (C10-C13) to olefins for high-yield linear alkylbenzene (LAB) production with low TNN conversion rate.

- ODH: Oxidative Dehydrogenation of Propane: A novel technology for converting propane to propylene and ethylene with high selectivity, highlield, and economic advantages compared to conventional processes worldwide.
- Fuel nano additive: The mechanism of action of these additives is based on storing oxygen during abundance and releasing it during scarcity. Their main functions include reducing fuel consumption by up to 18%, reducing fuel pollutants by up to 50%, and cleaning the combustion chamber
- Asphaltene inhibitor: This technology prevents asphaltene deposition and suspended particles in oil, improving its flowability and increasing oil recovery efficiency.

#### **About Company:**

This company by designing, manufacturing and mass-producing laboratory and educational equipment and providing scientific and practical training services to about 700,000 students and hundreds of teachers and registering dozens of inventions, have succeeded in providing services to the community.

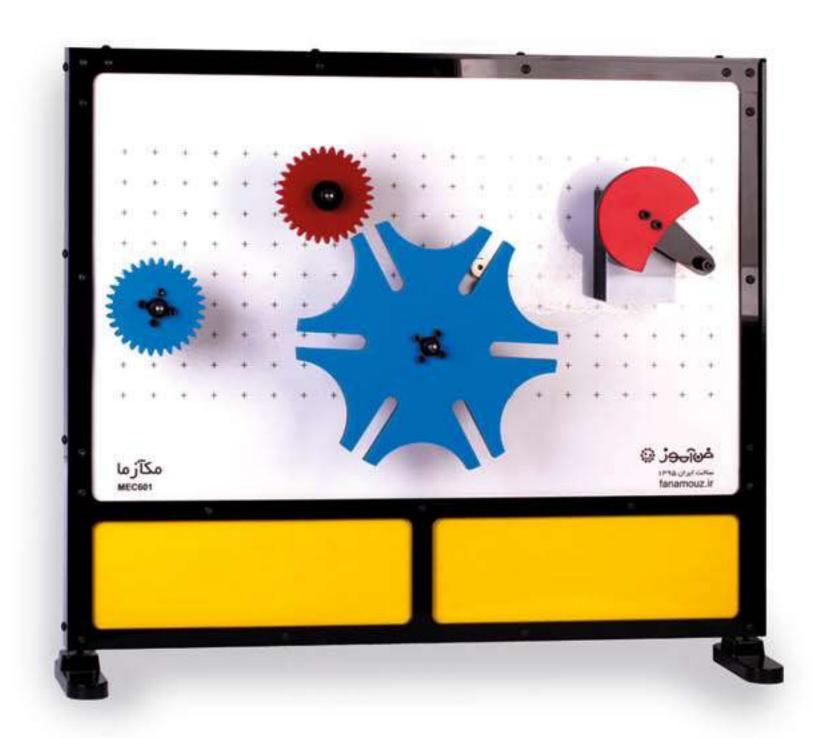

Competitive Advantages:

technology area

- Noorazma: A set of geometric light experiments (geometric optics) for students to use at home and at school
- Automatic Hand Sanitizer: Hand sanitizer (alcohol sprayer) model HLT902
- Ball thrower: Scientific teachings such as observing falling balls standing and suspended in the air
- Giant cab carrying cabin: Experience increasing mechanical advantage by increasing the distance of the point of effect of the driving force relative to the abutment
- Body conductivity meter: Conducting a conductivity test
- Semi-cylindrical mirror: Experiment with seeing images as semi-real images
- Manual power generator: Experience the law Conservation of energy
- Tesla High Pressure Converter: An interesting and important experiment in the field of electricity and electromagnetic waves
- Tesla high voltage converter 1000 kV: Training of strong electromagnetic fields
- Kaleidoscope: Experience seeing images with attractive geometric composition
- Curved mirrors: Testing curved mirrors
- Laser harp: Experiment with the phenomenon of light scattering by airborne particles
- Laser tag: Laser tests
- · Laser telecommunications: Laser tests
- Newton's cradle: Newton's laws of physics
- · Newton's cradle with two mechanical arms: Newton's laws of physics
- · Visual error panel: Testing visual errors
- · Geometric optics kiosk: Geometric optics experiments
- · Pedal wind generator Bernoulli law: Bernoulli's law experiment
- Photoelectric power generator: Conductivity test
- Pedal power generator: Power generator test
- Periscope: Periscope test
- Palsma ladder: Arc experiment
- Audio mirrors: Test audio mirrors
- Color shades: Experiment with the physics of light and the combination of colors
- Istab: Light radiation test
- Transverse wave machine: Wave experiments
- Wave pendulum: Wave and vibration tests
